

EBC[®] BRAKES

— 2018 EDITION —

WORLD'S LARGEST RANGE OF PREMIUM REPLACEMENT MOTORCYCLE BRAKES

Brake pads, rotors, braided stainless
brake lines, clutches and much more
with four manufacturing plants in the
UK and USA producing over 10 million
components each year

Welcome to 2018 and the latest EBC Catalog with, as always, all the new brakes and clutches you need for your customers.

With over 35 years in the USA motorcycle market, we can only thank again our thousands of loyal dealers for their support through the years. Carrying EBC as an alternative product line to genuine parts continues to make good commercial sense, saves inventory dollars, increases hit rate on sales and offers a truly long-term solution to stocking aftermarket parts.

EBC also represents a sound investment as products do not perish or age, and with the help of your distributor and the stock rotation programs that many of them offer you, you don't get left with a bunch of old mis-matched inventory which could easily happen with other "New kid on the block" brands.

WHATS NEW FOR 2018?

NEW RANGE OF CLUTCHES FOR HARLEY-DAVIDSON®

Standard CK clutch kits with coil springs or diaphragm springs where required plus a range of SRC and SRK kits and clutch replacement tools.

UTVX ROTORS

A new range of sport rotors for the Side X Side market is included this year, see the UTVX range.

BRAIDED BRAKE HOSES

Stainless steel braided brake hoses - factory built and individually pressure tested after assembly.

Inside this catalog you will find a wall poster that will help show customers the designs of our rotors and give basic pad selection pointers.

Once again **THANK YOU DEALERS** and have a great 2018 selling season.

MOTORCYCLE BRAKE PADS

Aramid Fiber Organic FA Series Pads

"X" Pads

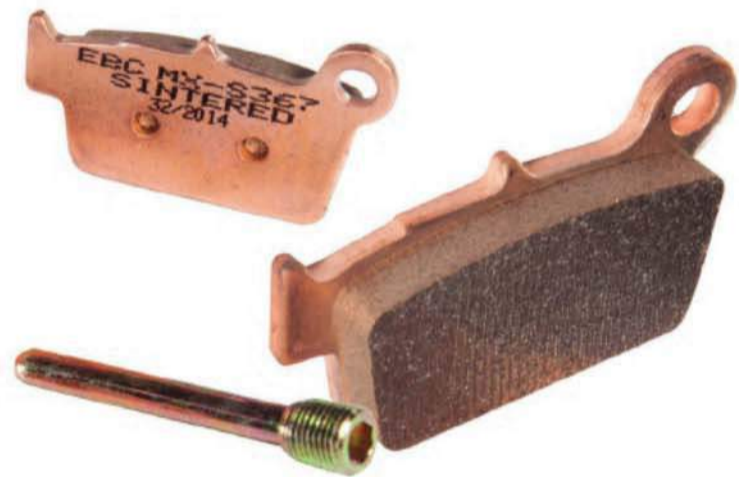

FA series organic brake pads will deliver fingertip stopping power and superb brake feel and control, the preferred choice for many sportbike riders. This compound has low disc attack characteristics and gives medium lifetime.

"X" series moto-x sport and enduro pads, cool running based pad compound for sport use in moto-x and ATV applications. For mud, sand or wet conditions requiring longer life, use our sintered range below.

Double-H™ Pads

MXS Series Pads

FA series with HH suffix, EBC's American-made ultra high friction Double-H™ sintered copper alloy brake pads for maximum stopping power and lifetime. With stainless steel radiator plates to reduce heat transfer and double compact for wider pads.

"MXS" moto-x race pads, ultra high friction American-made sintered copper alloy with diamond ground surface finish for fast brake-in. With external hex drive slider pins, these pads are suitable for all fast moto-x riding.

"R" Series Pads

SV Pads

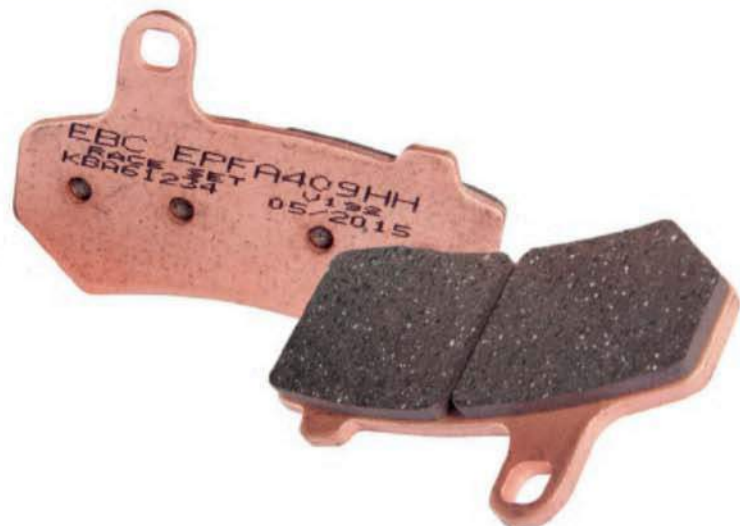

"R" series American-made sintered copper alloy ATV and Moto-X replacement pads for sport and utility off road riding.

"SV" series severe duty ATV pads, high density copper alloy for longest possible life in utility applications on ATV, especially in wet, mud, dust and dirt conditions.

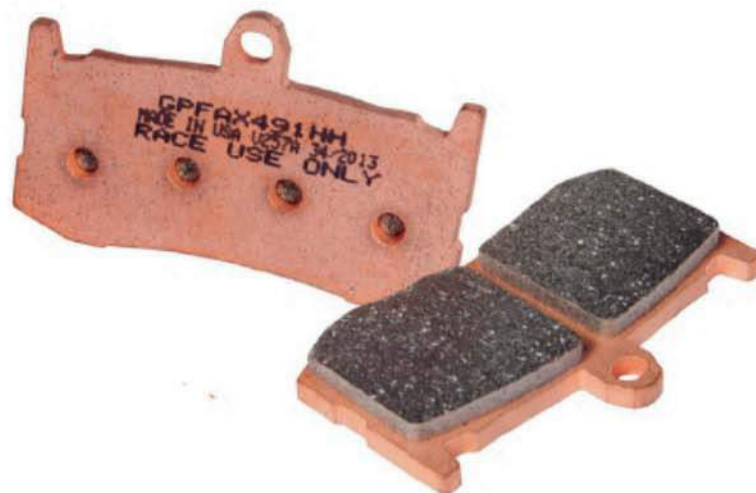

MOTORCYCLE BRAKE PADS

EPFA Trackday Pads

EPFA trackday pads give long life in street use with improved fade resistance and heat cycling plus improved noise characteristics, making this a great pad for heavy streetbikes and cruisers as well as faster superbikes. Great for intermittent track use.

GPFX Race Series Pads

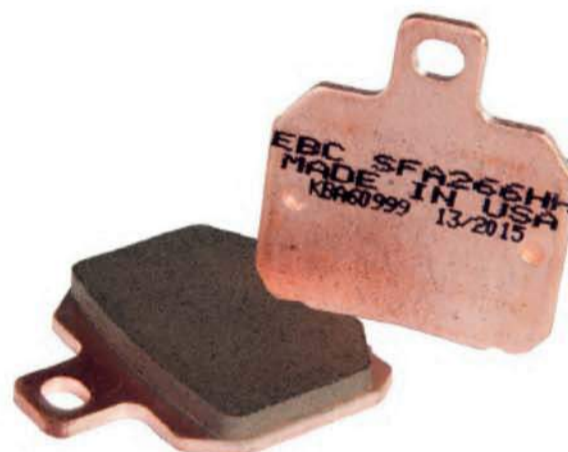

GPFX pads are an ultra high friction RACE ONLY pad, not designed for street use due to their high friction level.

SFA Organic Scooter Pads

A superb general replacement pad for urban use on scooter mopeds, mopeds and moped. Made using aramid fibres, these pads give above average lifetime, reduced rotor wear characteristics and offer great value for money.

SFA-HH Sintered Scooter Pads

These American-made sintered scooter pads are long lasting with high performance HH rated stopping power for perfect braking - wet or dry. The HH pads target the faster and heavier scooter market and work well with stainless steel brake discs.

SFAC Carbon Scooter Pads

A high durability carbon organic compound giving higher pad performance and longer life for the mid to heavy scooter range. UK-made using 30% copper powder by weight with carbon granules.

MOTORCYCLE BRAKE ROTORS

X and XC Series Sportbike Rotors

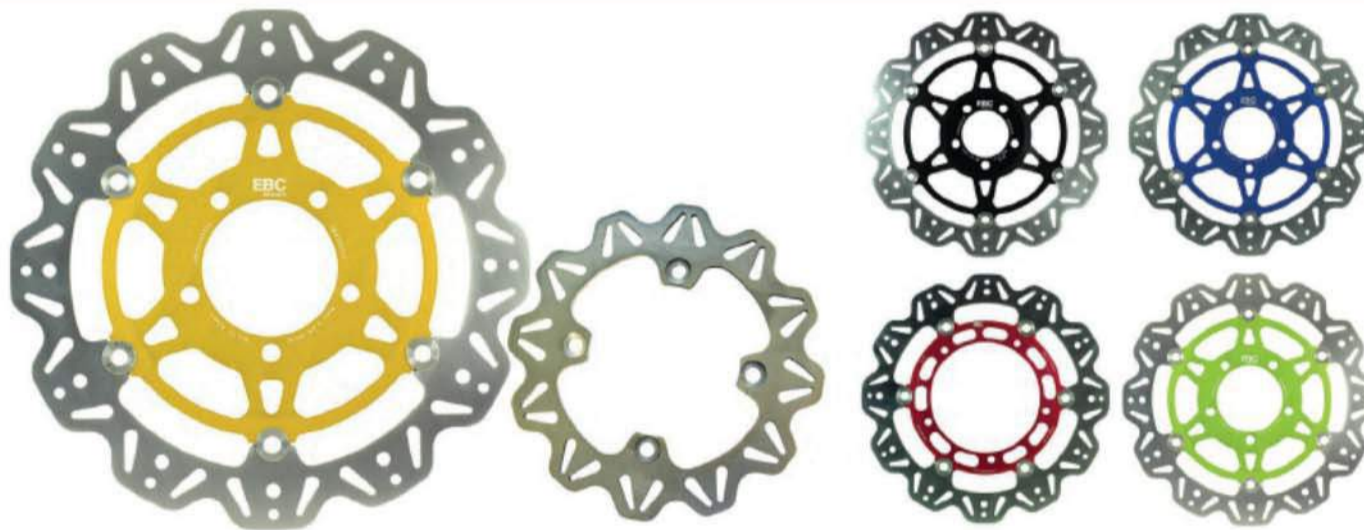

X and XC series rotors feature mill hard stainless steel high friction rotor blades for maximum brake effect and are direct size for size replacements for OEM rotors. These lightweight rotors feature our patented SD system square drive button system.

VMD Classic Style Rotors

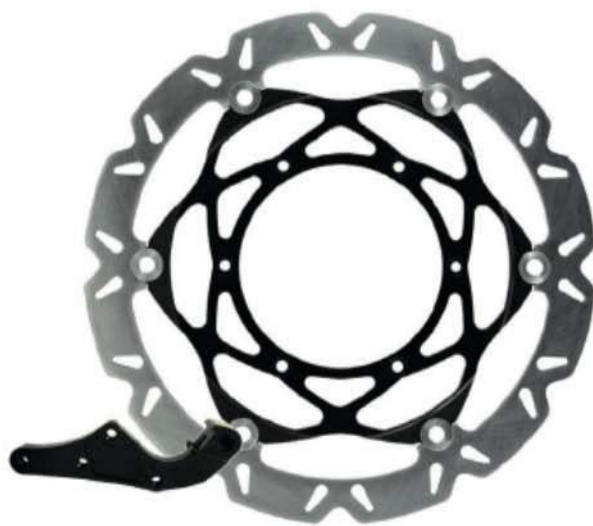

These lightweight, black anodised vintage rotors are new to our range. The vintage fitment benefits from billet aluminium construction; lightweight, less unsprung weight enables better handling and stopping power. Perfect for the Café racer scene.

Sportbike VR Series Rotors

Vee profile lightweight rotors with alloy hubs and ground stainless steel rotor blades for fast street bikes. Choose from black or colored hub options as shown above. To order prefix with VR and suffix with chosen color BLK, RED, BLU, GRN, GLD. For rear rotors just the VR number.

Supermoto Brake Rotor

SMX rotor with vee design contoured rotor, 320mm rotor upgrade kits complete with relocation bracket.

Rear Brake Rotors

Made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction.

MOTORCYCLE BRAKE ROTORS

MD Series Stainless Scooter Rotors

Made from mill hard rolled steel, these rotors are machined to match the original units, mechanically de-stressed to avoid rotor distortion, surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting.

VR Series Stainless Scooter Rotors

Made in the UK using German mill rolled heat treated and precision ground stainless steel, the new VR series stainless profiled scooter sport rotors are the lightest and best looking on the market and can be used with any type of brake pad.

UTVX Rotors for ATV/Quad/4x4

These self cleaning rotors look great and give an improved brake performance. Made in our British manufacturing facility using durable, tough German mill rolled stainless steel, heat treated & diamond ground to give great braking for less than OEM prices.

CX Extreme Off Road Rotors

CX Extreme self-cleaning lightweight stainless rotors are a size-for-size replacement/upgrade for front and rear fitment on all modern motocross machines.

Oversize MX Rotors

250 or 280mm motocross oversize rotor kit complete with billet aluminum relocation brackets for improved brake power and control with vee design rotor.

BRAKE ROTORS FOR AMERICAN MOTORCYCLES

5 Button Fully Floating

Polished Stainless Steel

10 Button Fully Floating

Custom polished brake rotor for American motorcycles, the new EBC range of high luster brake rotors features stainless steel brake rotor rings/blades and a polished stainless steel center hub. Newer units feature the contoured and slotted rotor profile as shown above which greatly improves bed-in and reduces rotor damage (rotor galling). The reason we have opted for stainless steel center hubs is due to the weight and heavy nature of larger American built motorcycles which can lead to more vibration or frame shake.

5 Button Fully Floating

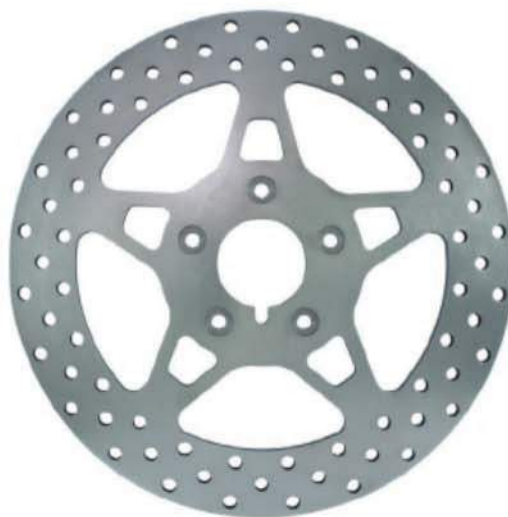

Black Chrome

10 Button Fully Floating

Made in the UK these quality fully floating brake rotors feature stainless steel center hubs for maximum strength in either a polished stainless or black chrome over stainless finish. The EBC rotors use a patented SD or "Square Drive" button system which will guarantee a lifetime of warp free/vibration free braking on your machine. As with all EBC big twin brake rotors, all components and hardware are stainless but in addition to the high lustre center hub, we have applied a black chrome finish to improve the cosmetics.

Solid Stainless Steel Rotor

We also offer a five spoke $\frac{1}{4}$ " thick solid rotor for front fitments and $\frac{3}{16}$ " for rear fitments.

MOTORCYCLE CLUTCH OPTIONS

CK/CKF Series Clutch Kits

DRC/DRCF Series Clutch Kits

CK complete engine sets of stack height controlled friction plates feature the EBC Brakes' unique alloy particle impregnated clutch facings that prevent burn up or slippage. CKF carbon fiber impregnated kits for ATV and moto-x use are built to last longer, grip and feel better than cork kits.

DRC is the ultimate clutch rebuild kit for your ATV and Moto-X machine. The DRCF kit swaps the stock type cork friction plates for a set of severe duty carbon fiber lined friction plates for better heat and wear abilities.

SRC/SRK Series Clutch Kits

CSK Coil & Diaphragm Clutch Kits

SRC is an aramid fiber lined plate set with heavy duty clutch springs (diaphragm type springs included where required). Ideal for heavy sport bikes, faster riders and production based race use. SRK series includes a full engine set of aramid lined friction plates with clutch springs and steel separator plates.

CSK sets include either coiled springs or diaphragm springs where appropriate. Coil springs are spiral wound with 4 to 8 pieces per set, made from heat treated high carbon steel delivering the right tension for your bike. Diaphragm springs are dish shaped flat steel pressure rings.

Clutch Removal Tools

Made in the UK by EBC Brakes, these laser cut clutch tools make clutch removal, loosening of the drive shaft bolts and re-tightening a breeze, without any fear of damage to your expensive clutch basket. Tools can be extended to create more leverage if required with any simple workshop tool or tube. EBC Brakes produce a clutch tool for almost every clutch plate design known.

REAR

This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Kevlar® Organic or Vee pads. SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

BRAKE APPLICATIONS

*-2 Sets Required. ■ - Also available in MX-S race compound. SAFETY WARNING:- DO NOT USE HH PADS ON REAR UNLESS ALSO USED ON FRONT TO AVOID BRAKE IMBALANCE

⚠ This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Kevlar® Organic or Vee pads.
 SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

BRAKE APPLICATIONS

⚠ This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Kevlar® Organic or Vee pads.
 SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

*-2 Sets Required. ■ - Also available in MX-S race compound. **SAFETY WARNING:- DO NOT USE HH PADS ON REAR UNLESS ALSO USED ON FRONT TO AVOID BRAKE IMBALANCE**

FRONT: Non-Japanese Bikes

This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Kevlar® Organic or Vee pads.

SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

CYCLE DISC BRAKES

EBC Brakes offers three pad compounds for your mountain bike:

Green Coded X-Country Compound - No Suffix

EBC Brakes X-Country mountain bike brake pads are an all round pad for trekking, cross country use or riding for pleasure. This compound is the perfect choice if you are unsure which type of pad is best for you.

Where the brake disc is unhardened and the use of a resin pad is recommended, this range of EBC Brakes X-Country mountain bike replacement brake pads is the perfect choice due to low disc abrasion features and it delivers long lifetime and excellent stopping power.

Red Coded Downhill Compound -"R" Suffix

"R" suffix brake pads are designed for downhill use and are extra high in friction. Lifetime is quite short but performance is great with low disc damage and very little heat transfer into the hydraulics.

EBC Brakes "R" suffix mountain bike replacement brake pads are an organic compound suitable for use on all disc types. Some brake systems use nylon or plastic fluid lines which are prone to softening and swelling when overheated. Sintered pads are not suitable for use with these systems as they generate too much heat, therefore we recommend using the "R" suffix brake pads.

Gold Coded Double-H Sintered Compound For Wet Riding - "HH" Suffix

Double-H™ sintered brake pads last much longer than organic brake pads because they have a higher friction rating and give longer life and better brake performance and are therefore great value for money. These high quality brake pads are made in the USA and are used by some of the world's greatest mountain bike sportsmen.

This compound is not suitable for use with a mountain bike where the discs are for use only with resin pads - EBC Brakes® Double-H™ replacement mountain bike brake pads will score the unhardened brake discs.

All EBC Brakes replacement mountain bike brake pads are made using magnetic stainless steel backing plates. Where required, EBC Brakes mountain bike brake pads come with improved strength retraction clips.

CYCLE BRAKE ROTORS

VR SERIES "VEE" ROTOR - Standard Size Replacement Brake Rotor

- Premium heat treated stainless steel
- Diamond ground surface finish
- Ultra lightweight Vee profile for better braking
- Suitable for use with any type of brake pad
- International standard 160 mm Ø / 6 bolt fitting

This EBC brake rotor is a direct size for size replacement for any disc brake system fitted with an IS 160mm size original rotor.

Order part number VR160.

OVERSIZE BRAKE ROTOR KITS

EBC offers two upgrade options with these oversize brake rotor conversion kits - 160/165mm-180mm (medium power upgrade) and 160/165mm 203mm (mega power upgrade) and the option of full circle profile or new lightweight contoured profile.

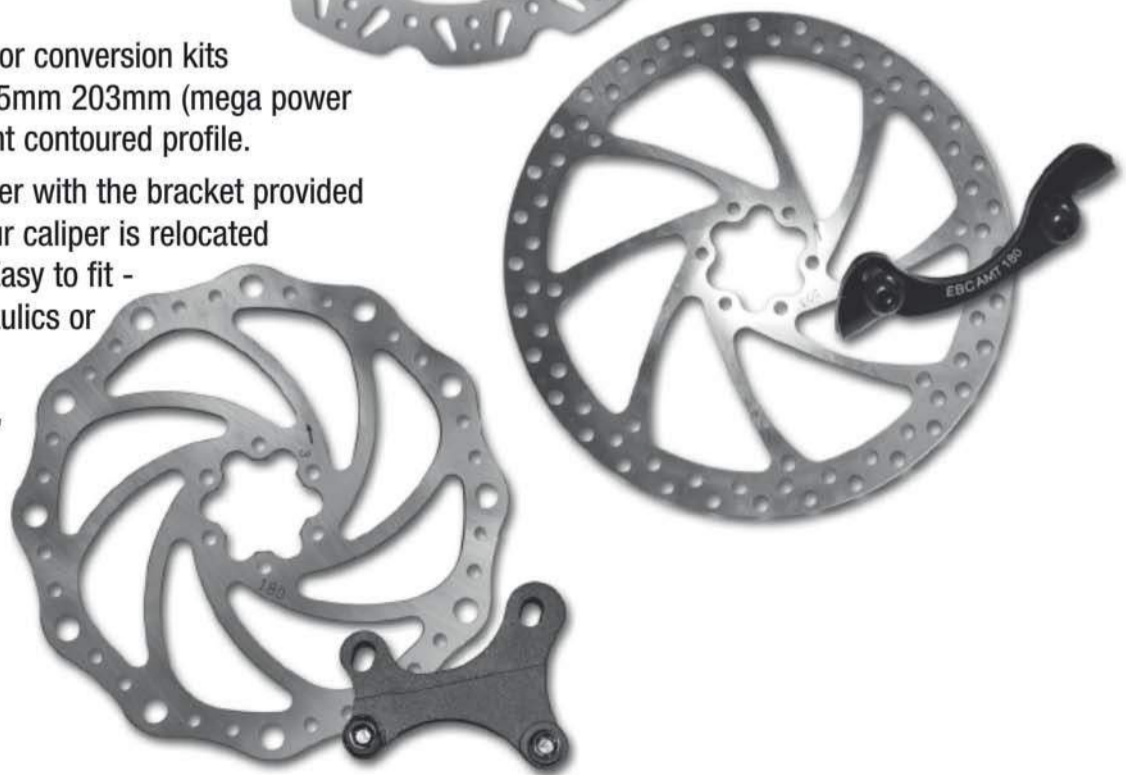

These mount on most standard 6 bolt wheel hubs and together with the bracket provided fit most forks with 50mm IS mount or 74mm post mount. Your caliper is relocated outwards giving you a stronger brake and better brake feel. Easy to fit - no other changes are necessary to your caliper, cables, hydraulics or lever. All you need are two allen keys.

These are premium quality heat treated stainless steel rotors, diamond ground and compatible with every type of mountain bike brake pad. Kits are available to convert standard 160/165mm up to 180mm

(order part number MTBD160-180 for circle profile or MTBD160-180C for contour) or 160/165mm to 203mm or 180mm to 203mm (order part number MTBD160-203 for circle profile or MTBD160-203C for contour).

BRAKE LINES

EBC Brakes braided brake lines are manufactured in Great Britain from the highest quality materials, with braided stainless steel PTFE hose and grade 303 stainless steel precision machined fittings. At EBC Brakes we do not use mild steel or aluminum components in our brake lines, instead we choose stainless steel for every fitting, as this material offers maximum quality in terms of strength and corrosion resistance. EBC brake line kits are supplied 100% complete and include brand new stainless steel bolts for maximum visuals.

EBC Brakes braided hoses fit many bikes in front, rear and race designs. Braided hoses improve brake pressure transfer to the caliper and disc pads, they help improve lever feel and reduce "bulging" which may happen with standard rubber hoses. Braided hoses are also more resistant to abrasion or cuts common with off road riding and thereby improve safety.

EBC brake lines are designed and built to last, that's why every line is offered with a lifetime warranty. Every individual line is pressure tested after assembly and as an absolute guarantee of quality, EBC brake lines are manufactured to Federal Motor Vehicle Safety Standards (FMVSS-106) and have the following approvals: DOT, TÜV, ISO9001, DEKRA, ARAI, CCC AND ADR.

BLM is our standard braided hose series whereas BLMR series race hoses have fewer lines and are the choice for track and performance use giving an even firmer lever feel and improving service time. Racing kits take the shortest route from the master cylinder to the caliper. The lines usually bypass any Y-splitters in the existing system, this reduces the number of places where the brakes can leak. The two lines from the master cylinder are a lot easier to bleed than a system with a Y piece as each line bleeds independent of the other whereas with a Y piece they don't until fluid is below the Y piece.

Hose numbers are suffixed with a number and letter designating the number of hoses in the kits and front or rear, for example;

BLM6038-1F is a kit with a single hose for front fitment

BLM8111-3F is a kit with three hoses for front fitment

BLM8113-1R is a kit with a single hose for rear fitment

BLMR8114-2F is a race kit with two hoses for front fitment.

We do not sell BLMR race hoses for rear fitments, only front.

Some kits are sold as complete bike sets only and examples of numbering are

BLM8169-4FR which is a four hose kit for a complete bike (front and rear).

All motorcycle brake lines (except Harley) are supplied with black stainless fittings, clear hose and red/blue EBC Brakes heat shrink.

HARLEY-DAVIDSON® BRAKE LINES

EBC Harley-Davidson® lines are supplied in a unique finish, with chromed stainless fittings, black hose and black/space-grey EBC Brakes heat shrink.

Additionally, where many competitors use 'off the shelf' components, EBC Harley-Davidson® lines are manufactured using our own bespoke design of chrome plated hardware and brackets, ensuring perfect fitment for complex Harley-Davidson® brake line assemblies.

MOTOCROSS AND OFF-ROAD BRAKE LINES

EBC Brakes motocross and off-road brake lines are supplied with a hardened plastic sheath around the lower portion of the hose, to provide additional protection against damage which could otherwise result from the harsh and unforgiving conditions of off-road terrain. These brake lines are built to withstand a lifetime of off-road abuse, ensuring high performance and safe riding for the lifetime of the vehicle.

**Abutment Shims (2 per set)
(REF SHFA200/201)**

Note: Only fit abutment shims to caliper if they have been fitted by factory from new.

Some early models of this caliper do not require enclosed shims. If your vehicle has shims fitted then replace with this new set. If in any doubt contact EBC Brakes for clarification. In any event it is essential that the pads (with or without shims fitted) are a snug fit in the caliper but also are free to slide on the sliders arms. Do not force pads into the caliper which could cause an over-tight situation and brake seizure may occur.

How To Make Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. EBC Brakes' sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.

ACCESSORIES

BRAKE FLUID

Now tested to meet Florida EPA requirements. Bottle label shows all specifications of the fluid.

DOT 4 - A refined specification polyglycol fluid as fitted to most faster street bikes now produced.

DOT 5 - Silicone fluid as used in Harley Davidson Motorcycles and many special High Performance Brake systems.

BF307 - Highly refined Dot 4 Brake fluid, ideal for Racing or High performance Road bikes. Can be used in all systems specifying Dot 3 or Dot 4 but **NOT** with (Dot 5) silicone fluids.

**EBC Brake Fluid is available
in DOT 4 or DOT 5 (Silicone)
Grades or BF 307 Race
Grade.**

Caution: Please check carefully the type of brake fluid used in your system. Adding incorrect fluids could cause major brake failure. DO NOT ever mix glycol fluids (Dot 3, Dot 4 or BF-307) with Dot 5 silicone.

BRAKE CALIPER LUBE

These sachets of dedicated, high viscosity greases are perfect for all of your customers' brake service needs. Always use sparingly on caliper slider pins and rails, but to NOT get near the pad surface and do NOT use as anti-squeal as it will not help at all. Each sachet contains 5 grammes of grease.
