

Brake disc lock Detecto 7000 RS1

Technology

- 3x5 mm steel bolt
- The bolt, body and the structural parts of the locking mechanism are made of specially hardened steel
- Alarm function which emits a 100 dB noise for 15 seconds and then automatically re-arms itself
- 3D position detection – detects vibrations and the slightest movement in all three dimensions and triggers the alarm
- Acoustic and optical signal (LED, 3 colours) indicate battery status and active status
- Single-hand operation thanks to the patented “Snap'n Go” system – lock closes automatically when pressed on the brake disc
- ABUS Extra Classe cylinder with coded reversible key
- Two keys are included in the scope of delivery
- Automatic keyhole cover to protect against dirt and corrosion

Operation and use

- Great protection for when there is a medium risk of theft
- Recommended for use in supervised car parks or for short parking periods

Transport

- A neoprene transport bag is included with the lock

Tips

- This lock can be keyed alike with other locks which means that one key can fit several locks
- Batteries are included with the lock (AAA micro)
- For increased security, the motorbike should be secured to a fixed object with another lock for longer parking periods

Modern – vigilant – loud
