

Lock-Chain Combination CityChain 1010

Technology

- 23/64" thick hexagonal chain with textile sleeve to protect against damage to the paintwork
- The chain, the housing and the structural parts of the locking mechanism are manufactured from specially hardened steel
- ABUS Plus cylinder for high protection against manipulation attempts, e.g. picking
- Two keys included in the scope of delivery, one of which is LED lit
- Automatic keyhole cover to prevent corrosion and the ingress of dirt
- ABUS Code Card for duplicate and replacement keys

Operation and use

- Good protection against medium risk of theft
- Ideal for protecting light motorbikes and scooters
- The greater the chain length, the easier it is to attach to a fixed object

Transport

- For secure transportation we recommend the Transport Bag ST1010 (only fits 43 5/16" and 55 1/8" chain lengths)

Tips

- You can order several one-key-fits-all locks. That means you can use a single key or closure in conjunction with multiple locks
- Very easy handling, because only one end of the chain has to be locked

Top security for city and countryside
