

Brake disc lock GRANIT™ Detecto XPlus™ 8077

Technology

- The 13.5 mm locking bolts, body and structural parts of the locking mechanism are manufactured using specially hardened steel
- 3D position detection senses vibrations and the slightest of movements in all three dimensions and triggers the alarm
- Alarm function with at least 100 dB for 15 seconds followed by automatic reactivation
- With its automatic brake disc detection system, the lock can be transported closed without the alarm going off
- Acoustic and visual signals (multi-coloured LEDs) display the battery and activity status
- ABUS XPlus cylinder for exceptionally high protection against manipulation attempts such as picking
- Two keys are included in the scope of delivery, one of which is an LED torch key
- Two AAA standard batteries are included in the scope of delivery

Operation and use

- Excellent protection where the risk of theft is high
- Recommended for securing high-value motorbikes

Transport

- A carry case is included in the scope of delivery

Tips

- You can order several keyed-alike locks with this lock. That means that a single key or mechanism can be used for several locks
- Brake disc locks are the most compact category of motorbike locks and are therefore easy to transport
- To increase security during longer parking times, you should also lock your motorbike to a fixed object
- The 3D detection system warns the motorcyclist if the motorbike is moved from its stand while the lock is still connected to the brake disc
- In the active state, the red flashing light acts as an additional deterrent
