

# Brake disc lock GRANIT™ Detecto XPlus™ 8008 2.0

## Technology

- 16 mm steel bolt
- The bolt as well as supporting elements of the locking mechanism are made of special hardened steel
- Alarm of at least 100 dB
- Alarm function on basis of the ABUS 3D detection system that means, that every movement is detected
- Different acoustic signals inform about battery, activation and alarm status
- ABUS XPlus cylinder for highest protection against manipulations, e.g. picking
- Two keys are supplied with the lock, one LED lighted
- Manually operated keyhole cover to protect against dirt and corrosion
- ABUS Code Card for additional or replacement keys
- Lock can be transported in locked condition without activated detection system thanks to automatic brake disc recognition system

## Operation and use

- Very good protection at high theft risk
- Recommended for securing valuable motorbikes

## Transport

- Protective bag included for easy and secure transportation in a special compartment e.g. under the seat

## Tips

- This lock can be ordered keyed alike to other locks. This means several locks would match one key, respectively key code
- One CR2 Battery for the alarm function is included
- Brake disc locks are a very compact category of motorbike locks and consequently easy to transport
- To increase the security during longer parking time it is recommendable to secure the motorbike to a fixed object additionally
- Thanks to the 3D detection system the motorbike rider gets warned when lifting the bike into upright position and an unintended ride off with the locked bike is prevented
