

INSTALLATION INSTRUCTIONS PART 45-1838 (formerly 45-1805) GL1800 TRUNK RACK

Note: Read instruction thoroughly before installing. This rack is designed

- to work with or without the lighted spoiler
- to carry up to 10 pounds only. Do not overload.

1. Place bike on center stand.
2. Open the trunk and remove the lock stays and inner lid. Unplug the control box.
3. Carefully place the rack on top of the lid and move as far forward as possible without touching the backrest area. Make sure the rack is in the center. Place masking tape on trunk to mark position. Remove rubber cups on legs and discard. Place a piece of masking tape under each leg. Double check the placement and mark the outline of the legs. Drill four ¼ inch holes in the center of the outlines. Remove the tape.
4. Attach the rack to the lid with a cup washer and rubber washer under the leg, then under the trunk lid; a rubber washer, a steel washer as shown. Use screw provided and put screw through washers and into the trunk leg. Do not over tighten.
5. Reinstall the control box, inner lid and lock stays.
