Eagle or Ball : Insure it is hand tightened.

Flag Poles: Raise locking nut and insure pole is screwed into clamp or fold down base all the way. Lower locking nut into place.

Fold Down Base: Using an Allen wrench, tighten base until movement to desired stiffness to move the flag pole up and down.

Clamp: Attach clamp around rail or flat rack. Using screw provided, screw from underneath the bottom of the clamp.

Note: Check periodically for tightness of all items.
