

**Handles better than stock.**

Just because you have a bigger wheel, it doesn't mean you need to skimp on performance. Decades upon decades of racing, riding and building suspension has taught us plenty about how a motorcycle works. The American Suspension Bolt on Neck rake and trail geometry is calculated to handle perfectly on the road.

Kit Geometry	26" Kit	26X" Extended Kit	30" Kit
Neck°	+4°	+9°	+9°
Tree°	+8°	+8°	+8°
Total Rake°	38° (Similar to weld on necks)	43°	47°
