ARIETE OPTICS
TECHNOLOGY

MANUFACTURED IN ITALY  Since 1947

70 YEARS OF HISTORY

Welcome to Ariete. For over 70 years, our company has been responding to the needs of motorcyclists from all over the world by providing high quality rubber and plastic products. The family nature of our managerial staff, now in its third generation, continues with the same passion and determination as the founder, Sandro Mentasti, who in 1947 conceived the idea of designing and manufacturing high quality motorcycle accessories and spare parts for motorcyclists.

The high quality in Ariete is achieved by global research programs with a focus on high quality raw materials processed using sophisticated, environmentally friendly production technologies in accordance with our Sandro Mentasti Environmental Protection Program.

We have been producing goggles for Off-Road, Outdoor and Defence area for many years.

We work together with our passionate and dedicated expert partners who have gained experience in the company in its 70 years. This enables us to provide global markets with high-end products designed, manufactured, tested and certified that are able to fully satisfy the most demanding Sportswear need for both the Moto and Outdoor worlds is that it should operate under the most extreme conditions, such as on the slopes of a deserted track on a snow-capped mountain.

The spotlight for the 2018-2019 catalogue is on Outdoor goggles for Skiing, Snowboarding, Ski-mountaineering, Winter Trekking, Mountaineering, Mountain Biking and many other outdoor sporting activities. The programme encapsulates the essence of the spirit of "Made in Italy by Ariete". Enjoy your read!

Ariete: the evolution of Made in Italy experience.

EXPERIENCE

MADE IN ITALY

Since it was founded in 1947, **Ariete** has become a leading supplier of rubber and plastic parts for the motorcycle industry. We have gained multiple world championships with our off-road and snowmobile goggles, and now present the new outdoor range for Skiers, Snowboarders and Outdoor athletes.

Thanks to the quality of the materials used, and our technical capability, these goggles are a market-leading product.

Ariete Outdoor Goggles Collection are conceived, engineered, designed and manufactured in Italy with Ariete Optics Technology.

INFORMATION FOR LENSES

07-ADRENALINE-RIDING CROWS

CAT. 0

CLEAR AIR

Recommended for nocturnal use, it reduces the distortion and glare caused by artificial light.

MULTI-LAYER RAINBOW

Defines and enhances every detail in low light conditions. Restful for the eyes, and recommended for use at night.

YELLOW DESERT

Enhances contrast in low or dim light with plain background, recommended for use with low level lighting, in cloudy or misty weather.

CAT. 1

LIGHT CORAL

Increases definition and image contrast. Recommended for use in fog, poor visibility or cloud.

BLUE SKY

Neutral tint, reduces glare in different light conditions. Reduces light intensity.

BLUE CREEK

Fumé blue, neutral colour to reduce glare in variable conditions. Reduces light intensity, and enhances contrast.

MULTI-LAYER BLUE

A lens for every application, which improves contrast in bright sunlight e reduces glare.

CAT. 2

MULTI-LAYER GREEN

For conditions of medium to bright sunlight. A neutral-coloured lens which provides near-perfect colour perception.

MULTI-LAYER RED

Noticeable reduction in glare, enhancing contrast and the definition of the image.

CAT. 3

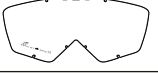

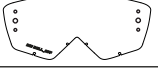

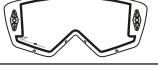

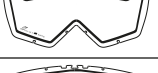

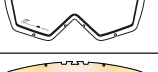

SILVER CHROME

Provides noticeable reduction in light intensity.

ARI®

THE ORIGINAL
FORK OIL SEALS

MANUFACTURED IN ITALY  Since 1947

Welcome to Ariete!

After 70 years, we are now at the third generation of family management, our company is known and appreciated all over the world for the high quality of its products.

In this catalog we present our specific line of fork oil seals ARI that, with over 175 different types, equips more than 35,000 models of motorcycles with traditional forks and Upside Down forks (USD), from the telehydraulic operation mode of the 1960's to the pneumatic mode (ARIA) particularly famous in the Off-road world.

Each oil seal has individually rectified sealing lips to ensure absolute perfection of the seal on the fork leg.

The experience gained in these 70 years of activity has led us to obtain in addition to the ISO 9001:2015 Certification also the BS OHSAS 18001:2007 concerning health and safety in the workplace. At the same time, we also take care of the impact of our work on the environment according to the strict disciplinary "Sandro Mentasti Environmental Protection Program" which is giving us excellent results in safeguarding the territory in which we live.

Therefore, we continue to carry out our business with passion according to the inspiring principles of our founder Sandro Mentasti who, back in 1947, had the idea of designing, producing and offering motorcyclist's accessories and spare parts with the highest quality: **the Ariete quality.**

Ariete: evolution of the made in Italy experience!

ARIETE NAME ON EVERY SEAL

 Be assured that the original ARIETE[®] products guarantee compliance with the highest measures of quality and Environmental protection set by the strict standards of Sandro Mentasti Srl. Recently, many imitations of our Ariete[®] products have been put on the market, also imitations of our HARRI'S[®] and ARI[®] - the original fork oil seals. These low-quality models pose a risk to the user's safety both on the road and off-road.

WARNING: DO NOT BUY COUNTERFEIT and NON-ORIGINAL PRODUCTS.

In order to find out whether the purchased item is original by Ariete[®] or is counterfeit, we apply a hologram to the original packaging. To check its authenticity in a few easy steps:

* Register and enter the 13-bar code number or, alternatively, the alpha-numeric code of 2 letters and 6 hologram numbers

 **ARIETE FORK OIL SEALS, custom-made for your fork**

Ariete fork oil seals are different! The quality of their execution is matched by the unique nature of the material used: the carboxylated elastomer known as XNBR. This compound offers unique characteristics of resistance to abrasion, to high temperatures, and to the complex lubricants with numerous additives, which are used in modern forks as fitted to motorcycles and scooters.

The reciprocating action of the fork tube against the seal subjects it to a notable degree of abrasion, which is complicated by the heat generated as a result of hydraulic displacement within the fork, plus the friction of the components involved. This mechanical wear and tear leads to accelerated ageing of the rubber which is also obliged to deal with the chemical action of the various additives in the lubricant.

Oil seals are normally made from a nitrile rubber, known as NBR. This is used because it is cheap, and plentiful, not because NBR is the best material for the job.

Our technical staff have accumulated 70 years of experience in the rubber industry, and have spent many years looking for a better material for the manufacture of oil seals.

In our view, the carboxylated elastomer known as XNBR has the following major advantages when compared with NBR:

Although the cost of XNBR is almost twice that of NBR, the sophisticated technology used to make our oil seals enables us to put them on the market at highly competitive prices. In this way, the Ariete Customer enjoys the benefits of a very high quality product, which satisfies the most demanding requirements, at a competitive price.

TEST	STANDARD	NBR NORMAL	XNBR
Load to breaking point (PSI)	ASTM D412	2130	3270
NBS abrasion resistance %	ASTM D1630	210	590

 **ARISIL special oil seal lubricant**

ARI fork oil seals are made from a rubber compound specifically developed to work with the lubricants used in front forks, with all their various additives. This compound is completely different from that normally used for rotating shaft seals, since the physical environment inside a fork with its reciprocating movement, and the specialist lubricants, are completely different. We have designed **ARI** oil seals with a variety of lip profiles to make them longer lasting, while reducing to a minimum the friction effect against the moving shaft. Over the years, we have discovered the key role of a separating lubricant between the fork tube and the rubber of the oil seal to reduce to a minimum the surface friction, without affecting the function of the oil seal. After exhaustive testing, we have chosen a lubricant which is produced in the USA, and devised specifically as a rubber/metal lubricant for mechanical components used in the NASA space program. The advantage of this special grease, which we call **ARISIL**, is that it extends the life of the oil seal, and helps it retain its vital characteristics of flexibility and chemical resistance. For this reason, every set of **ARI FORK OIL SEALS** contains a single dose sachet of **ARISIL**, sufficient to lubricate the two oil seals supplied.

EXCLUSION OF LIABILITY

We recommend that you check the size and specification of the seals supplied by comparing them with the original seals before fitting them. ARI products, while being of very high quality, may be subject to damage in case of impact or accident. Before using Ari products, please carefully read the instructions for use and installation. Sandro Mentasti Srl makes every effort to ensure that the information contained in this catalogue is correct and easy to understand, with some information specific to individual products, but accepts no responsibility for any misinterpretation. In any event, Sandro Mentasti Srl is not liable for any damage to property and/or persons caused during the use of its products, and neither for any damage resulting from incorrect use and/or use other than that for which the product was originally intended, and damage resulting from assembly errors and/or incorrect installation.

Sandro Mentasti Srl manufactures its products directly, and markets them with the ARI brand. The use contained within the catalogues of any original product codes bearing brands other than those mentioned above is intended as merely descriptive, as well as the possible use of trademarks and / or names of other manufacturers (for example, PIAGGIO, HONDA, YAMAHA, SUZUKI, KAWASAKI, BMW, HARLEY-DAVIDSON etc.), which Sandro Mentasti Srl is in no way connected. The only purpose of this use is to describe the accessory and/or the part.

EXCLUSION OF LIABILITY

Ariete, ARI and Harri's products, while being of very high quality, may be subject to damage in case of impact or accident. Before using Ariete, Ari or Harri's products, please carefully read the instructions for use and installation. Sandro Mentasti Srl makes every effort to ensure that the information contained in this catalogue is correct and easy to understand, with some information specific to individual products, but accepts no responsibility for any misinterpretation. In any event, Sandro Mentasti Srl is not liable for any damage to property and/or persons caused during the use of its products, and neither for any damage resulting from incorrect use and/or use other than that for which the product was originally intended, and damage resulting from assembly errors and/or incorrect installation.

Sandro Mentasti Srl manufactures its products directly, and markets them with the ARIETE, ARI and HARRI'S brands. The use contained within the catalogues of any original product codes bearing brands other than those mentioned above is intended as merely descriptive, as well as the possible use of trademarks and / or names of other manufacturers (for example, PIAGGIO®, HONDA®, YAMAHA®, SUZUKI®, KAWASAKI®, BMW®), which Sandro Mentasti Srl is in no way connected. The only purpose of this use is to describe the accessory and/or the part.

Sandro Mentasti Environmental Protection Program. This project, founded in 2007, is born out of the desire to promote and apply a more environmentally friendly business culture based on the compatibility between our industry and environmental protection. The commitment aims at reducing energy consumption in production, at eliminating toxic materials, and looks at a proper development of research and technological innovation with the goal of respecting the natural environment. All of our products marketed with Ariete, Harri's and ARI brands are the expression of our philosophy of dialogue between ecology and industry. Concrete results have already been achieved in the company's energy saving through ecologically certified electrical transformers, in the management of special waste disposed of in compliance with law by specialized and homologated companies, in the management of recycling, in the drastic reduction in water consumption by means of a closed loop system for the thermo-conditioning of presses and equipment, in the optimization of the heating system of the departments and offices thanks to new thermal condensing boilers with almost zero emissions in the atmosphere, in the considerable saving of paper for internal use (forms, photocopies, e-mail prints, etc.), and the adoption of packaging of ecologically classified products, with catalogs printed strictly on "certified" recycled paper.

#ROSSOARIETE

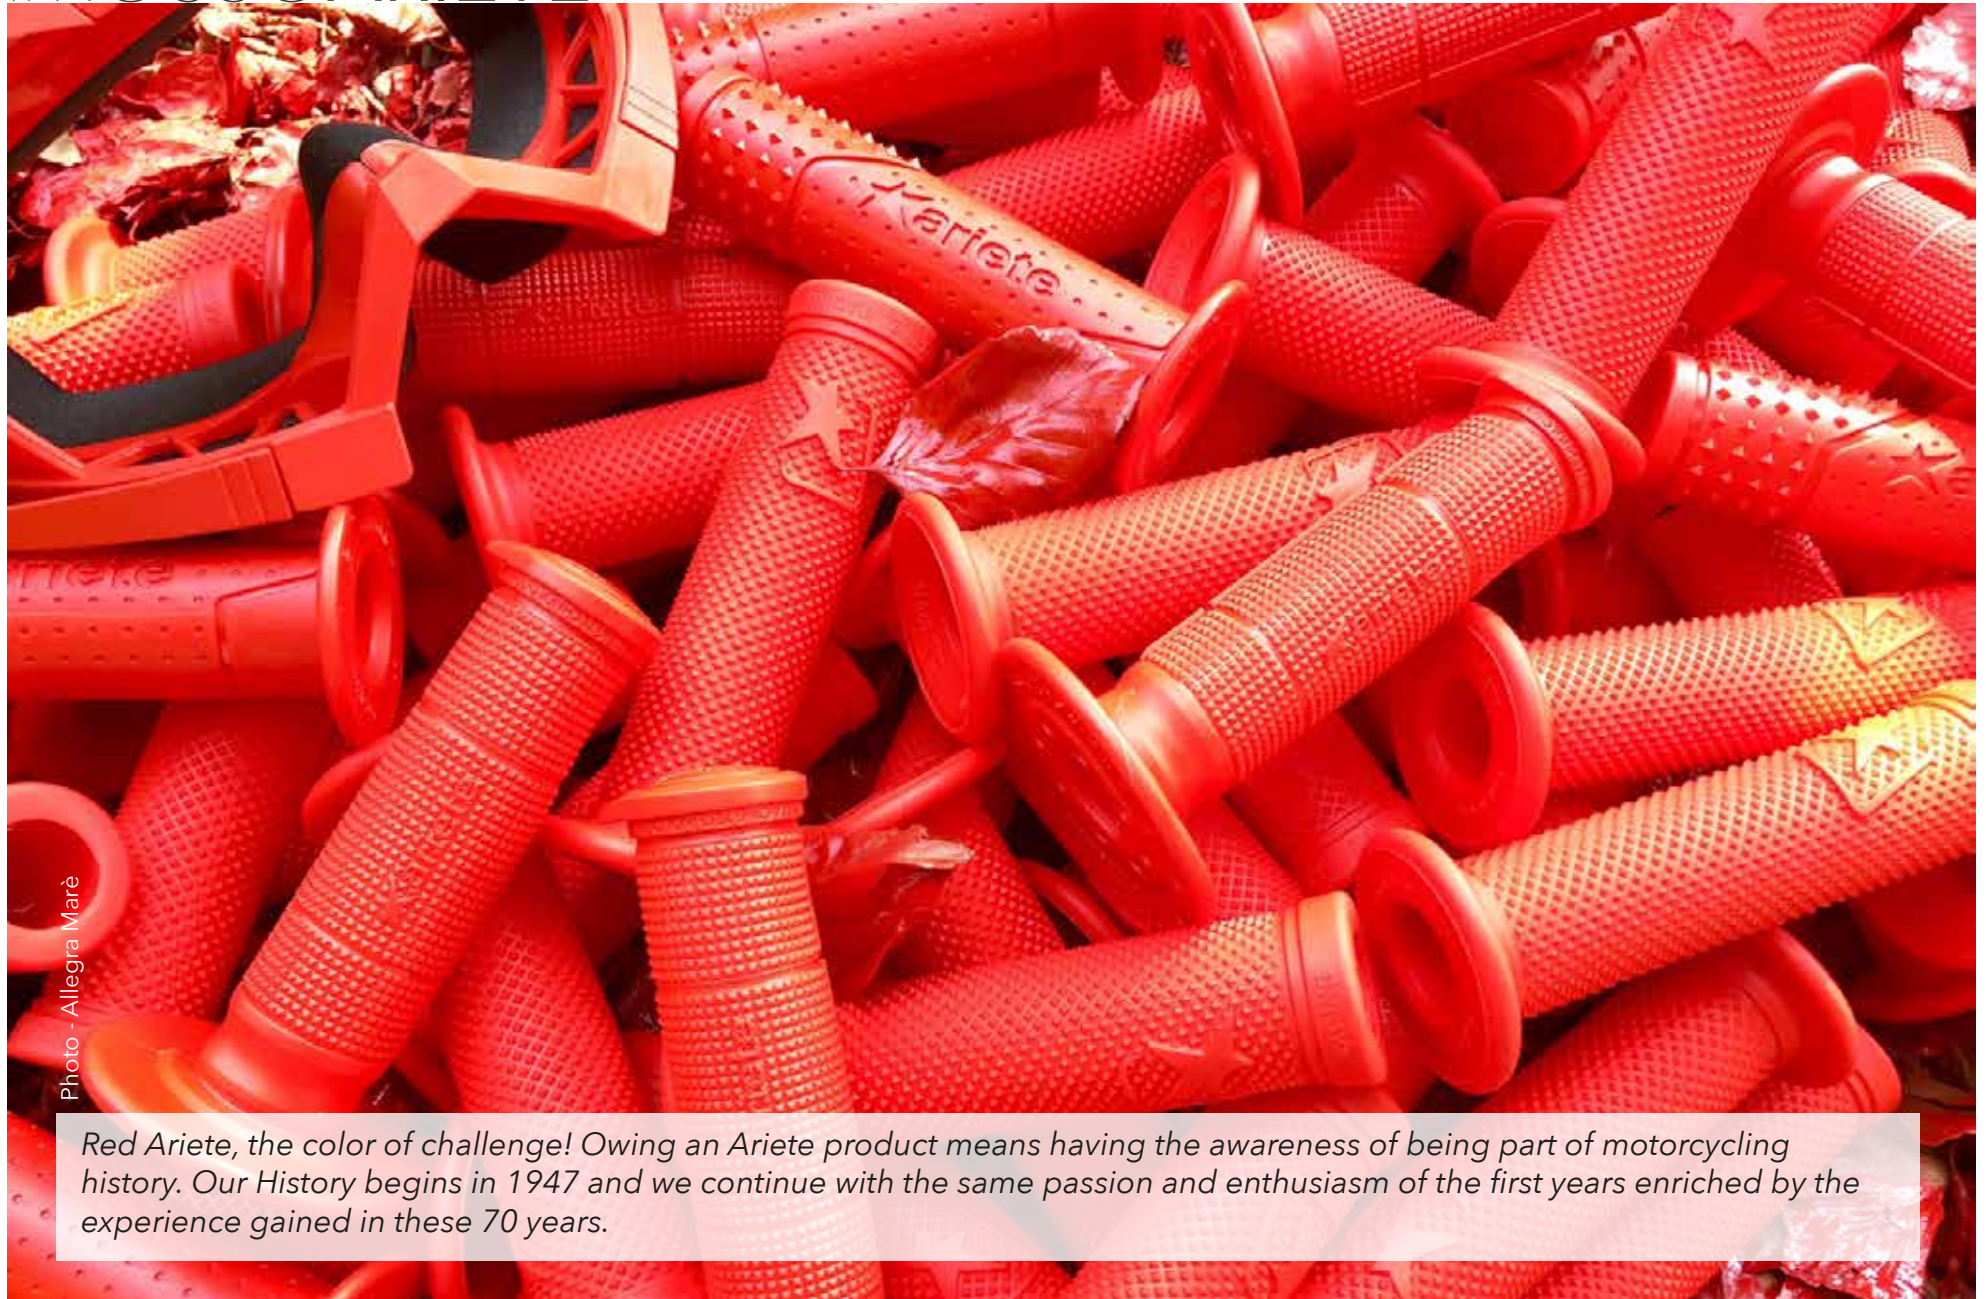

Photo - Allegra Marè

Red Ariete, the color of challenge! Owing an Ariete product means having the awareness of being part of motorcycling history. Our History begins in 1947 and we continue with the same passion and enthusiasm of the first years enriched by the experience gained in these 70 years.

HIGH TECHNOLOGY

ARIETE EXPERIENCE

HIGH
QUALITY

INNOVATION

RESEARCH

GOGGLES TECHNOLOGY

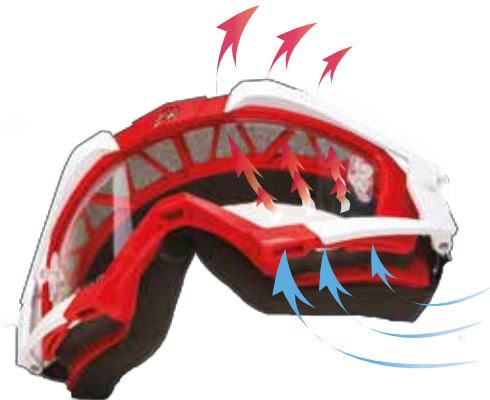

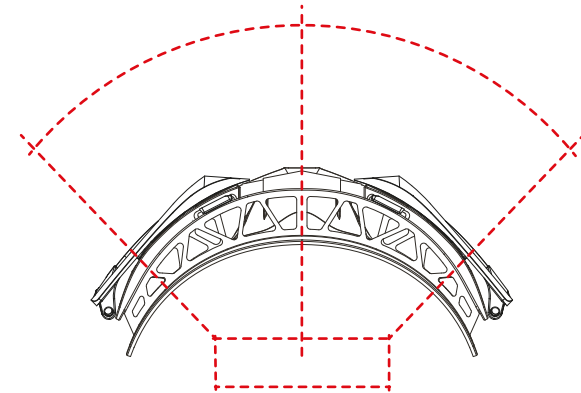

RACE-BASED DEVELOPMENT

Each project is refined and tested by Ariete riders in relevant off-road world championship events. Rider feed-back is agreed and incorporated into the final design before this is submitted to the certifying authority for approval.

FIELD OF VISION

Ariete technicians have developed a frame that allows a wide field of view both laterally and vertically. This feature makes a vital contribution to rider safety. Adrenaline and Riding Crows goggles are OTG - over the glasses models.

A.V.S. ARIETE VENTILATION SYSTEM

The Ariete Ventilation System uses carefully chosen areas for the intake and exhaust of cooling air. Airflow from the goggles, whose upper front profile is specially lowered to aid this process, enters the collecting vents at the front of the helmet, flows across the rider's head, and leaves the back of the helmet in a continuous process.

GOGGLES TECHNOLOGY

ERGONOMICS AND AVANT-GARDE DESIGN

the shape of Ariete goggle frames was born from experience under extreme conditions. Ariete technicians have focused on the ergonomics of the frame to ensure that it perfectly fits the rider's face. The hypoallergenic materials used and the Ariete Ventilation System (A.V.S.) make Ariete goggles uniquely comfortable.

HIGH TECHNOLOGY

Ariete goggle frames and ancillary components are made with the best technology available. The quality of the tooling ensures that the finish achieved is exemplary.

FINE MATERIALS

The search for new materials is never-ending. Ariete has for years worked with the world's best-known petrochemical companies. The materials used are the result of research carried out by these companies, and are the best we can find.

SAFETY GOGGLES TECHNOLOGY

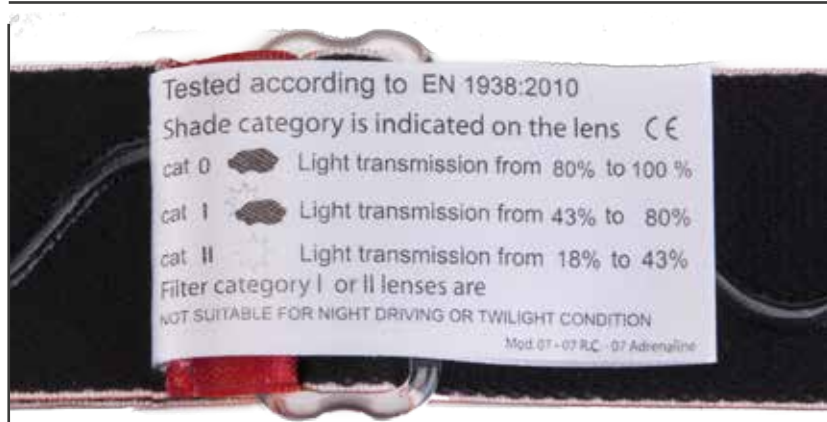

CERTIFICATIONS

Ariete goggles and lenses are certified according to European standards EN 1938:2010; they are provided with Anti-fog treatment, which is optional under European standard EN 1938:2010; they pass the "High Mass" and "High velocity" impact tests provided for by American ANSI standard Z87.1-2003; they meet the requirements of American standard VESC-8.

SAFETY

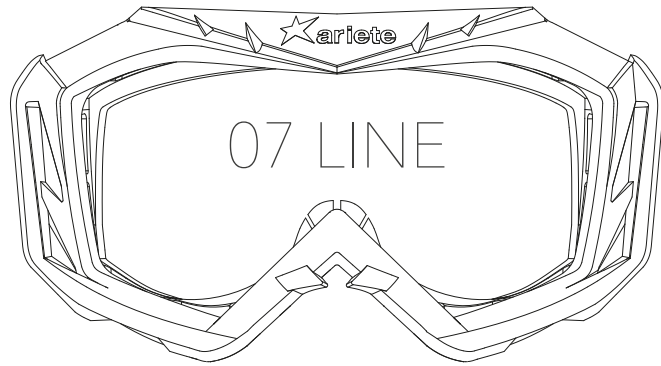

The ARIETE lens will withstand a 6 mm. steel ball hitting it at 135 miles per hour!
The anti-fog treatment withstands more than twice the minimum requirement of standard 168: 2001.16

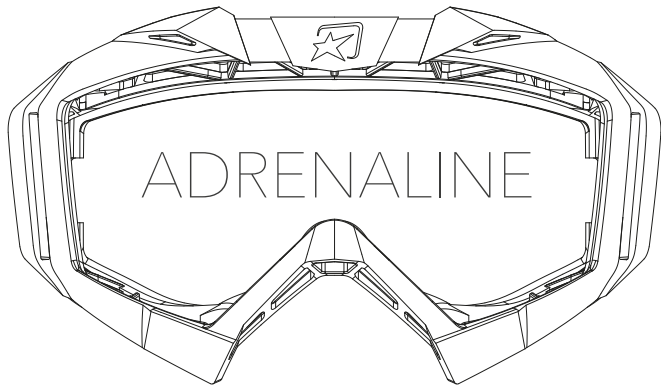

MARKING

The label on the goggles provides the transparency categories of Ariete lenses

TEAR-OFFS FOR 07 - ADRENALINE - RIDING CROWS

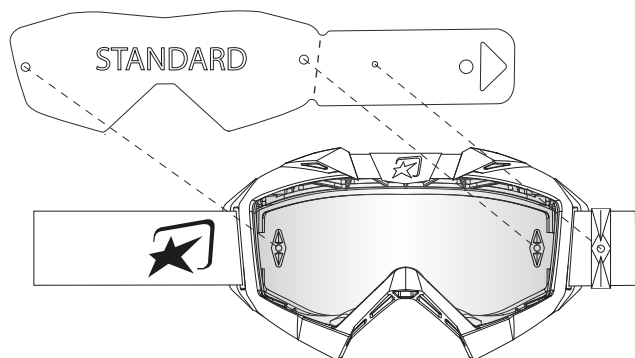

STANDARD

12964-TOLE

Kit 5 pacchetti, 6 Tear-offs/pacchetto. Lenti a strappo standard da applicare sulla lente.

Kit 5 stacks, 6 Tear-offs/stack Standard tear-offs to place on the lenses.

Kit 5 paquetes, 6 Tear-offs/paquete. Tirables estandard para utilizar sobre la lente.

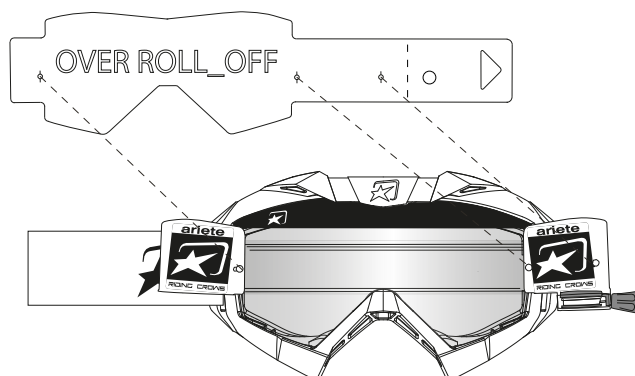

SUITABLE FOR ROLL-OFF STANDARD ROLL-OFF AND BIG/XL ROLL-OFF

12964-TORO

Kit 3 pacchetti, 6 Tear-offs/pacchetto. Lenti a strappo specifiche da applicare sul Roll-off.

Kit 3 stacks, 6 Tear-offs/stack. Specific tear-offs to place on the Roll-off system.

Kit 3 paquetes, 6 Tear-offs/paquete. Tirables específicos para aplicar sobre el Roll-off.

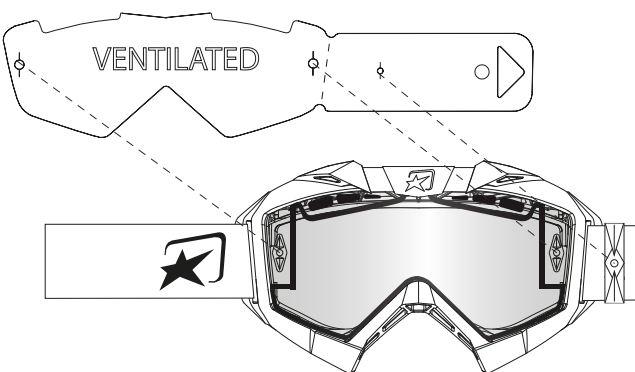

SUITABLE FOR VENTILATED LENSES

12964-TOV

Kit 3 pacchetti, 6 Tear-offs/pacchetto. Lenti a strappo specifiche da applicare su lenti ventilate.

Kit 3 stacks, 6 Tear-offs/stack. Specific tear-offs to place on ventilated lenses.

Kit 3 paquetes, 6 Tear-offs/paquete. Tirables específicos para aplicar sobre lentes ventiladas.

TEAR-OFFS

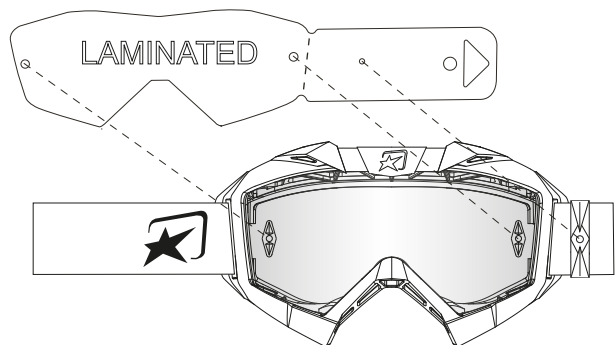

LAMINATED RECOMMENDED FOR RACE

12964-TOLL **Patented technology by Racing Optics® USA**

Kit 3 pacchetti, 7 Tear-offs/pacchetto. I tearoffs laminati sono 7 lenti a strappo "sigillate" tra loro.

Kit 3 stacks, 7 Tear-offs/stack. Mount 7 layers at one time and stack up to 21 tear-offs.

Kit 3 paquetes, 7 Tear-offs/paquete. Los tearoffs laminados son 7 películas desechables selladas entre sí, que puedes montar hasta 3 kits.

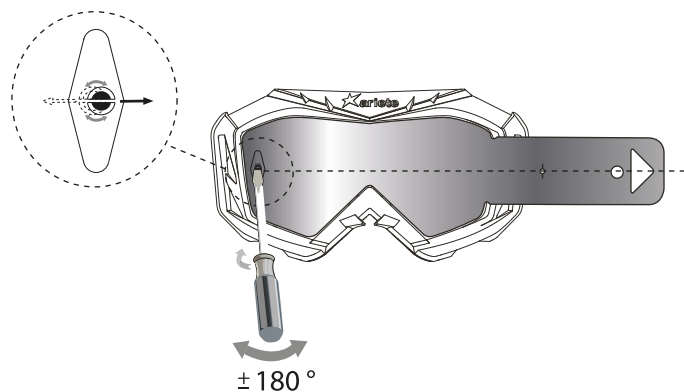

TEAR-OFF RACING PINS

12964-RE

Clips eccentriche regolabili per tear-offs. Tendono al massimo la lente a strappo evitando che polvere e sporco si infilino tra il tear-off e la lente, vendute a paio; uso professionale.

Eccentric pins for precise tear-off adjustment to avoid dust between lens and tearoff, sold in pairs, professional use.

Clips regulables para tender al máximo el tear-off evitando que el polvo y la suciedad se introduzcan entre la lente removible y el cristal, se venden por pares, uso profesional.

OFF-ROAD GRIPS TECHNOLOGY

OFF-ROAD GRIPS TECHNOLOGY

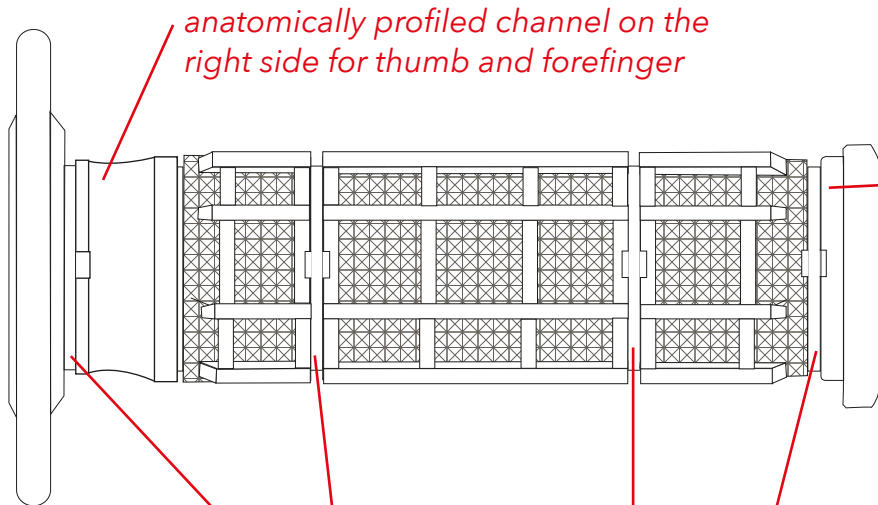

*palm in legendary supersoft,
critical finger-grip area with half-waffle surface*

*the fourth groove is situated at the extreme outer
end of the grip to prevent grit from being trapped
between bar and grip or bar and twist grip
when used with hand guards*

*outer flange pre-marked for piercing
with a cutting guide for use with all-round hand guards*

*pronounced inner flange with internal reinforcement,
coated in extra-soft XTouch*

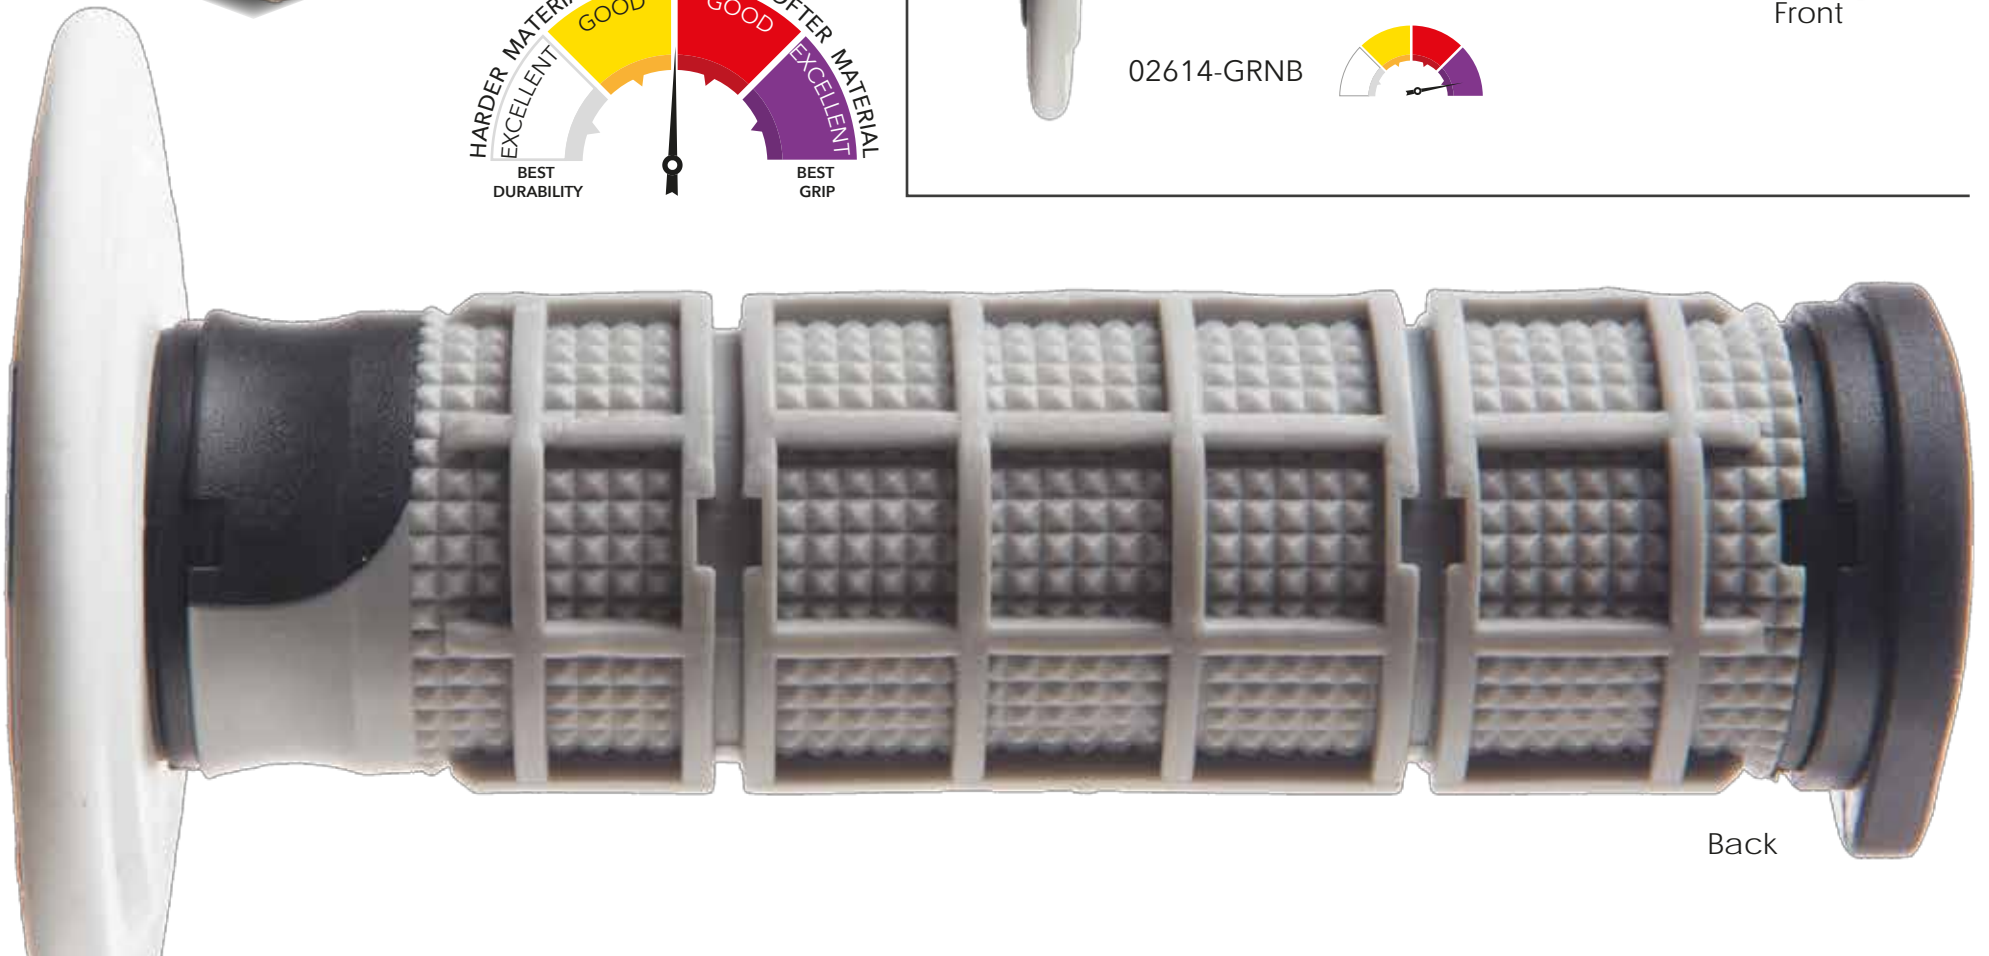

*anatomically profiled channel on the
right side for thumb and forefinger*

chassis in semi-rigid torque-limited elastomer

four grooves for steel wire give extra security

ARI THE ORIGINAL FORK OIL SEALS

ARI THE ORIGINAL FORK OIL SEALS BY ARIETE

*Ariete fork oil-seals are the best you can get. This claim is justified by the quality of the materials used, and attention to detail in their design and manufacture. The **ARI** range has more than 160 different seal sizes. These cover more than 35,000 different motorcycle models with both traditional and upside-down forks. We have seals for classic 1960s telescopic forks extending through to the air forks now common both on- and off-road. **ARI** fork oil-seals - perfection, from Ariete.*

A

ARIETE FORK OIL SEALS, custom-made for your fork

Ariete fork oil seals are different! The quality of their execution is matched by the unique nature of the material used: the carboxylated elastomer known as XNBR.

This compound offers unique characteristics of resistance to abrasion, to high temperatures, and to the complex lubricants with numerous additives, which are used in modern forks as fitted to motorcycles and scooters.

The reciprocating action of the fork tube against the seal subjects it to a notable degree of abrasion, which is complicated by the heat generated as a result of hydraulic displacement within the fork, plus the friction of the components involved. This mechanical wear and tear leads to accelerated ageing of the rubber which is also obliged to deal with the chemical action of the various additives in the lubricant. Oil seals are normally made from a nitrile rubber, known as NBR. This is used because it is cheap, and plentiful, not because NBR is the best material for the job. Our technical staff have accumulated 70 years of experience in the rubber industry, and have spent many years looking for a better material for the manufacture of oil seals. In our view, the carboxylated elastomer known as XNBR has the following major advantages when compared with NBR:

Although the cost of XNBR is almost twice that of NBR, the sophisticated technology used to make our oil seals enables us to put them on the market at highly competitive prices. In this way, the Ariete Customer enjoys the benefits of a very high quality product, which satisfies the most demanding requirements, at a competitive price.

ARI THE ORIGINAL FORK OIL SEALS

ARISIL

ARISIL special oil seal lubricant

ARI fork oil seals are made from a rubber compound specifically developed to work with the lubricants used in front forks, with all their various additives. This compound is completely different from that normally used for rotating shaft seals, since the physical environment inside a fork with its reciprocating movement, and the specialist lubricants, are completely different. We have designed ARI oil seals with a variety of lip profiles to make them longer lasting, while reducing to a minimum the friction effect against the moving shaft. Over the years, we have discovered the key role of a separating lubricant between the fork tube and the rubber of the oil seal to reduce to a minimum the surface friction, without affecting the function of the oil seal. After exhaustive testing, we have chosen a lubricant which is produced in the USA, and devised specifically as a rubber/metal lubricant for mechanical components used in the NASA space program. The advantage of this special grease, which we call ARISIL, is that it extends the life of the oil seal, and helps it retain its vital characteristics of flexibility and chemical resistance. For this reason, every set of ARI FORK OIL SEALS contains a single dose sachet of ARISIL, sufficient to lubricate the two oil seals supplied.

TYPICAL CHARACTERISTICS

Product type:	GREASE
Colour:	WHITE
Composition:	SILICONE LUBRICANT WITH ADDITIVES
Temperature range	-65° degrees c => +175° degrees c
Coefficient of friction	0.003 - load 6.3 n at 10 mm per second 24h
USA military specification	G-4343 C

10945 1 gr. - 0,03527 ounces 12950 100 gr. - 3,527 ounces

The Split fork seal driver is a tool used for changing the fork seals on conventional and upside down forks. Available for fork seals in 35 mm thru 51 mm configurations. Manufactured from plated carbon steel, featuring split design and weighted body. Weight range from 800 to 1.000 gr. Sold individually.

TECHNICAL ACCESSORIES

BRAKE CALIPER SEAL KITS

BRAKE CALIPERS SEAL KIT

EPDM HP Special Compound

The rubber brake seals in this kit are made in Italy by Aretete. After final grinding of the working surfaces, they are individually tested to guarantee their efficiency once fitted to the user's vehicle.

WARNING
Use only DOT3 or DOT4 brake fluid

MASTER CYLINDER SEAL KITS

BRAKE MASTER-CYLINDERS SEAL

Aretete introduces a new line of seal kits to suit brake calipers and master-cylinders for motorcycles and scooters. These are after-market replacements which fit many of the most popular models on the market.

The material used for the seals is a special compound of **EPDM HP**, developed by Aretete and fully compatible with the most common brake fluids (DOT3 and DOT4).

Ask for our special catalogue covering applications for different models of motorcycles and scooters.

TECHNICAL ACCESSORIES

DOT3 - DOT4 FLUID PIPE

12978/5 6x10 mm Pack. 5 mt. - 16' 5" black

Low-pressure hydraulic pipe to fit between remote reservoir and master cylinder, suits DOT3 - DOT4 fluid
