## IMPORTANT INFORMATION FOR WATER RESISTANT INSTRUMENTS

This instrument is water resistant on the face only. This includes normal car washing, even moderate pressure washing. It has not been designed to receive extreme water pressure or any washing on the back side of the instrument. We strongly recommend that you take precautions to protect the back side of the product from

these conditions. In order to prevent condensation, instruments require ventilation; this results in points of entry for mud and water through the backside. The back of the water resistant instrument must be protected in mud or dirt racing. Failure to take these precautions may result in voiding product warranty.
