◆ AUTOLITE® XTREME SPORT® SPARK PLUGS ARE ENGINEERED TO MEET OR EXCEED OE DESIGNS AND WITHSTAND THE EXTREME OPERATING TEMPERATURES EXPERIENCED DURING A POWERSPORTS ENGINE'S COMBUSTION. THEY WERE DESIGNED WITH IRIIDIUM-ENHANCED 0.6MM FINEWIRE DESIGN FOR IMPROVED IGNITABILITY, FASTER FUEL COMBUSTION AND A MORE FOCUSED IGNITION VERSUS STANDARD PLUGS. THEY ALSO PROVIDE UP TO 26 PERCENT QUICKER STARTS COMPARED TO THAT OF STANDARD PLUGS AND AS MUCH AS 21 PERCENT LESS HYDROCARBON EMISSIONS THAN STANDARD PLUGS, WHICH PROMOTES BETTER FUEL EFFICIENCY AND HORSEPOWER.

ROLAND SANDS DESIGN® TRACKER 2:1

Inspired by an exhaust you might find on a high-speed, wide-open flat track racer, these lightweight pipes give you unparalleled Vance & Hines performance and breathe some life into your Softail or Sportster. You might still wake up the neighbors, but you won't blow out your eardrums.

- Hand TIG welded head pipes
- Race-quality, high-temperature black ceramic coating
- Drilled-chrome heat shields with V&H logo stamp
- Chrome billet drilled exhaust tip with RSD Logo Stamp
- Made in USA

ROLAND SANDS DESIGN® SLANT 2:1

The newest collaboration between RSD/Vance & Hines brings you high-performance exhaust in a lightweight package. We've stripped our newest exhaust system to only the necessary elements, exposed the weld for a Works-style appearance and added a slash cut carbon and stainless tip for style points as well as performance. We've also done all we could to tuck the system up tight to the bike for ground clearance allowing usage of standard sporty mid controls and rear sets.

- All stainless steel construction with carbon fiber end cap
- Black high-temperature ceramic finish, tig welded w/18mm O2 sensor bungs. (O2 plugs not included – available as accessory)
- 1.75 to 2.0 in. stepped header tubes
- Heat shields for rear cylinder and collector inlet
- Fiberglass and SS wool baffle materials for high-temperature resistance
- Exhaust port gaskets included
- Made in USA

DUNLOP® MOTORCYCLE TIRES...PLACING A PREMIUM ON PERFORMANCE!

Ever since their first American-made Dunlop® tire rolled off the Buffalo, New York, production line in 1923, they have placed a premium on performance. Dunlop's Buffalo plant continues as the flagship production facility - with motorcycle tires designed and engineered there earning Dunlop® the proud distinction of being the only company manufacturing motorcycle tires in North America today. In September of 1999, Dunlop® Motorcycle Tires took another major growth step when it entered into a new partnership with Goodyear Tire and Rubber Company, as part of a joint North American venture, which will produce a wide range of premium tire products. Dunlop® is the only tire you'll ever see coming off the line on a Harley-Davidson® motorcycle. You'll find their name featured prominently throughout the industry's original equipment fitments - preferred, recommended and even required by companies and consumers everywhere who share Dunlop's uncompromising commitment to quality. That success is itself a demonstration of the performance power of being market responsive...offering the perfect tire to meet every rider's needs...a dose of Dunlop® to defang the Sport rider's addiction to the rush of racing...smooth-riding durability Street riders can count on to get them to whatever destination sparks their passion. We may call it "premium performance", but to the world, it's "Dunlop® Superiority".

DUNLOP® AMERICAN ELITE

- Only replacement motorcycle tire for Harley-Davidson® motorcycles, which is designed, tested and made in America
- Dunlop® American Elite replacement tire line ensures that industry-leading Dunlop® tires will be on your customers' Harley-Davidson® motorcycles for years to come
- Dunlop's decades-long engineering experience with Harley-Davidson® motorcycles is the foundation for the all-new Dunlop® American Elite line of replacement tires
- Tread design provides even tread wear and quiet operation in all conditions, wet and dry
- Sidewall design proudly features the American Elite name and made in USA logo

PIRELLI ANGEL GT

- Maintains Pirelli's high DNA levels in terms of performance
- Compared to its predecessor, Angel GT substantially increases mileage, grip and handling in the wet and, even more importantly, is able to maintain those properties at a high level over time
- Tread design on the Angel GT is an evolution of the Angel ST tread in technological terms and it is designed to provide regular wear and excellent water drainage that includes the updated tread grooves on the rear tire
- Dual compound product and uses a compound designed to obtain high mileage at the center, and the new compound on the sides features a high silica content in order to guarantee exceptional performance even in the wet
- Mileage increase of about 15% was obtained by using new compounds and new tire profiles, designed to work in synergy with the structure and the construction materials: all of this works together to obtain an extended mileage sport tire that maintains the handling advantage of the Pirelli brand

METZELER

METZELER ME 888 MARATHON ULTRA

- Focused on mileage improvement and overall wet and dry handling, these tires feature new profiles, structure, tread pattern and compounds
- New Compound technology offers improvement in two important areas: material and process.
- The compounds offer better abrasion resistance, thus, providing more mileage, but at the same time the choice of new resins improve the level of chemical grip on wet surfaces
- New tread design not only gives increased mileage vs. ME 880, it also has better water drainage, resulting in more resistance to aquaplaning
- Tire's profile modifies the shape and dimensions of the footprint; the contact patch is 5% shorter and 15% wider vs. ME 880; this profile has been chosen to improve the wear of the compound under footprint; a shorter and wider profile helps by better distributing the force necessary to transfer the engine torque to the ground
- All sizes in the ME 888 range benefited from mileage increase and wear regularity upgrades, placing ME 888 on the top of the category in mileage, handling, stability and comfort until the end of its life

CONTINENTAL MOTORCYCLE TYRES

Continental is Germany's largest tire manufacturer, fourth largest in the world and being founded in 1871 in Hanover, Germany, is also one of the oldest. They built their first motorcycle tire in 1904 and were on the first motorcycle that set the Land Speed Record at over 200 mph at Bonneville in 1956. Continental tires are test proven at the Contidrom test track which features 86° banking. Continental is committed to producing motorcycle tires using the very latest technology and compounds for today's bikes.

CONTINENTAL CONTI MILESTONE MILEAGE PLUS-CRUISE/TOURING

CONTINENTAL CONTI ROAD ATTACK 2 - SPORT MILEAGE RADIAL

- Revolutionary technology that offers a level of grip, safety, mileage and dynamics never known before in the sport-touring radial market
- Traction Skin; the revolutionary micro-roughness of the tread optimizes the mechanical adhesion and offers the safest, fastest break-in period in the market
- Continuous Compound Technology (shared from the ContiRace Attack product line): a single compound is used that through a temperature controlled curing process delivers the benefits of a multicomponent tire without the abrupt transition between the different compounds that other multicomponent tires are known for
- Center Tread Area, wear-resistant = mileage
- Shoulder Tread Area = increased grip from center to shoulder

AVON TYRES

Whether you're choosing a set of Avon Tyres for your Harley®, Power Cruiser, Custom, Xtreme Sport, Sport, Sport Touring, Standard, DualPurpose, SuperMoto, Sidecar or Vintage applications we place an emphasis on precision, quality and performance. Avon has been making motorcycle tires since 1911. Yet we don't just rely on our history and decades of experience, rather we build on it. We believe there's the "feel of the tire," that subjective element that exists between the rider and the tires that exemplify that the right tires do make a difference. Avon Tyres, your only contact with the road.
