BAKUP-USA

Installation Guide

BMW R1200RT Driver's Backrest

- 1. Place your bike on the center stand.
- 2. Remove the driver and passenger seat.
- 3. Remove the two (2) height adjustment blocks.
- 4. Place your backrest so that the holes for the height adjustment block align with the mounting holes for your new backrest.
- 5. Reinstall the height adjustment blocks using the hardware provided.
- Reinstall the driver and passenger seats.
 Note: you may have to push forward on the backrest in order to get the passenger seat in place.
