

CANYON DANCER

Warning:

This warning is for your protection! Don't ignore it and blame it on the harness.

NEVER start engine with harness installed.

NEVER install harness on loose bars.

NEVER install harness on any part of the motorcycle except the grips at the ends of the bars.

NEVER install harness on handlebars higher than four inches above the top triple clamp or handlebar clamp.

NEVER compress the front forks more than half way, or approximately two to three inches.

NEVER pull down on the straps hard enough to bend your handlebars.

NEVER install harness on motorcycles with extended forks (such as choppers).
