Ultimax MAX

Ultimax MAX® Belts by Timken

The new Ultimax MAX has an improved cog design for greater flexibility and cooler running. The new thicker MAX has added strength that provides longer belt life. MAX is designed for machines under 500 cc. One Year Warranty. Proudly made in the U.S.A.

Benefits

- Designed for vintage and lower-power snowmobiles
- New design with larger bottom cog to better handle demands of deep snow, towing, and shock loads
- Refined over decades to achieve best balance of flexibility, cord-retention and dimensional stability
- Longest-lasting, best-performing iteration of the venerable Incredible Max line of snowmobile belts

Materials and Manufacturing

- Fiber-loaded rubber designed for optimal grip on clutches and consistency over the life of the belt
- Strong and stable aramid cord for zero stretch and maximum tensile strength.
- Built with modern methods to reduce variability and eliminate “classic” failure modes
- Double cog construction provides greater belt strength while preserving flexibility

Dimensions

- Every MAX belt is manufactured using new processes that reduce dimensional variation so every belt performs consistently
- Dimensions match OE in cord length and width, meaning your sled will shift like new.
- Dimensions are held to tighter tolerances than OE belts

Over a million miles a year of documented field testing ensure that Ultimax belts stay ahead of the pack in value and performance.
