Advanced Cleaning Formula

Chemical Guys Signature Series Orange Degreaser is great at handling the toughest jobs that other generic degreasers can't handle. The all-new advanced citrus infused formula emulsifies the toughest grease and pulls it from the surface for a clean shine. Signature Series Orange Degreaser is perfect for removing heavy mud, dirt, and grime from your off-road and 4x4 vehicles. The powerful formula is great at cleaning greasy suspension and differential parts leaving every inch of your car or truck looking great all year round. Simply add a few ounces of the Signature Series Orange Degreaser to a bucket of water to mop and clean your dirty shop floor. Chemical Guys Signature Series Orange Degreaser gives you the power to handle the toughest cleaning jobs on earth.

Tough Citrus Cleaning Power

When cheap cleaners etch and stain sensitive surfaces and the "purple stuff" just won't cut it, reach for Chemical Guys Signature Series Orange Degreaser. Filth and grime are no laughing matter. All it takes is one burst hose, one slip of the funnel, or one leaky seal to turn an engine bay or garage floor into a greasy, oily mess. Chemical Guys blended Signature Series Orange Degreaser with powerful citrus extracts and hyper surfactants to easily cut through and separate grease and oil from any surface. The specialty formula easily cleans any spilled motor oil, coolant, hydraulic fluid, blinker fluid, or diesel fuel from engines. Remove caked-on mud, grease, and road grime from wheels, suspension components, and undercarriage parts. Break down burnt carbon and black deposits from exhaust systems and restore a brilliant shine to chrome and titanium tips. The uses are endless, and messes and spills have finally met their match with Chemical Guys Signature Series Orange Degreaser.

Versatile Cleaner For Any Job

Some messes are light and easy to clean; some are intense and very tough to clean. Signature Series Orange Degreaser ships at full strength. Without added water to dilute the product, users are free to tailor their own cleaning solution to take on whatever messes they are dealing with. For general purpose cleaning and degreasing, most detailers mix a 20:1 dilution ratio of Orange Degreaser: that means mixing 20 parts water for every 1 part cleaner. Most messes around wheels, undercarriages, and garage or shop floors can be spot cleaned with a 20:1 dilution of Orange Degreaser. More intense and oily messes may require more grunt and chemical cleaning power. For oily messes in engine bays or car exteriors, try mixing a 10:1 dilution of Orange Degreaser. With less water in the mix, there is more cleaner concentrated to clean tougher messes. Detailers save the full strength Orange Degreaser for intense filth like axle grease, differential oil, and automatic transmission fluid spills in undercarriages or driveways. Make your own custom blend to take on whatever messes you're dealing with. Take on any level of dirt, filth, grease, and grime with Chemical Guys Signature Series Orange Degreaser.

Dilution Ratio

Extremely concentrated. Dilute up to 20:1 for less-dirty messes.

Other Sizes Available

Signature Series Orange Degreaser is available in [4 ounce](#), [16 ounce](#), and [1 gallon](#) sizes.

How To Use:

- Only work on engines, wheels, or any other car part or surface that is not hot to the touch.
- Start by attempting to clean any given mess with a 20:1 dilution of Signature Series Orange Degreaser.
- Spray the solution directly onto the mess.
- Let sit for up to 5 minutes and agitate with an appropriate brush for the given surface.
- Rinse cleaner and mess away with a steady stream of free-flowing water.
- Do not let cleaner and filth dry on the surface.
- Check for desired results.
- If intense grime persists, mix a stronger 10:1 dilution of Signature Series Orange Degreaser and try again.
- Save full-strength cleaner for intense filth and messes.
