

How It Works

Use Chemical Guys Signature Series Glass Cleaner to finish every car wash or full detail with perfectly-clear glass. Windshields, mirrors, and side windows should be perfectly clear. There is nothing more annoying than fingerprints, smudges, or spots on glass and windows. Not only is it distracting while you drive, everybody has to point it out and tell you that you missed a spot! The professional grade Signature Series Glass Cleaner contains no noxious chemicals, no ammonia, and will not leave streaks, spots, or stains on glass or sensitive optical plastics. The versatile formula is safe for use on window tint, navigation screens, and plastic instrument gauge clusters. Signature Series Glass Cleaner cuts through tough grime, grease, dirt, and filth to restore perfect clarity to glass, mirrors, clear plastics, and optical grade plastics inside, and outside any automobile. Mist a few sprays of Signature Series Glass Cleaner on the window or on your microfiber towel, and simply wipe away any filth that obscures your vision. Use a second towel to buff away any remaining streaks and spots from the glass to restore pure optical clarity. Drive with confidence and gaze through your windows with the signature look of perfect clarity with Chemical Guys Signature Series Glass Cleaner.

Clear Glass Is Important For Safety

Here at Chemical Guys, we believe in maintaining our cars for safety's sake, so we know that clean windows improve visibility and help ensure a safe driving experience. Things as little as bird droppings, fingerprints, or even dust and dirt can obscure vision enough to distract the eye and potentially contribute to an accident. Our Signature Series Glass Cleaner helps improve clarity by removing dirt, bugs, and grime from automotive glass without leaving any streaks behind. Simply mist a light spray over any glass surface, wipe with a premium microfiber towel, then buff with a second dry towel to enjoy streak-free glass. The unique formula works on any glass surface, window tint film, and even on more sensitive plastics found on computer screens, LCD televisions, household windows, and even plastic windows and windshields like Plexiglas parts. There are enough distractions while driving; take any dirt, grime, or debris out of the equation, and use Signature Series Glass Cleaner for improved clarity and safety when driving out on the road.

Signature Formula For Professional Results

What's better than fixing a mistake or cleaning up dirt? If there was never any dirt to begin with! The Signature Series is all about producing the signature Chemical Guys look. With a few sprays of Signature Series Glass Cleaner, dirt and debris simply disappear. The advanced glass cleaner decontaminates the area fast, and reduces static cling to help repel future dirt and dust. While generic window cleaners leave streaks and harm window tint, the advanced Signature Series Glass Cleaner formula restores streak-free clarity without staining or damaging tint films or clear plastics. If you demand nothing but perfect clarity whenever driving down the road, choose Signature Series Glass Cleaner whenever cleaning glass and clear plastics inside, or outside your vehicle.

For Heavy Duty Glass Cleaning, Bring Out Signature Series

The heaviest dirt, stickiest grease, and thickest dust are all easily cleaned with Signature Series Glass Cleaner. Whether you're wiping down a museum-kept show car, cleaning the windshield after driving circles in a mud field, or removing smoker's film from inside the windshield, Signature Series Glass Cleaner is the professional's go-to product for crystal clarity through any automobile's clear bits. Mist a generous helping of glass cleaner to help break down oil or grease, or whenever decontaminating the glass with a clay bar. Some detailers even use Signature Series Glass Cleaner as a lubricant whenever scraping old stickers and decals off from windows and windshields. The slick glass cleaner helps glide any clay bar or razor blade over the glass without sticking or scratching the hardened surface with any loose bits of sand or metal. Remove the worst messes from automotive glass without wasting lots of elbow grease and time by choosing Signature Series Glass Cleaner on the front end of any detailing job.

Dilution Ratio

Ready to use.

Other Sizes Available

Signature Series Glass Cleaner is available in [4 ounce](#), [16 ounce](#), and [1 gallon](#) sizes.

How To Use:

- Do not clean windows until the very end of your detailing job.
- Mist Signature Series Glass Cleaner either directly over the window, or onto your microfiber towel to control overspray.
- Wipe the window in straight lines to remove dirt, grime, and debris.
- Flip to a dry side or switch to a secondary clean towel, and buff off any remaining streaks.
- Clean the inside and outside of the glass to restore full optical clarity to the window.
