

About V4 All In One

Chemical Guys V4 All In One Polish creates a mirror finish topped with durable protection in just one step. V4 cuts away light imperfections, scratches, and swirls, finishes like a fine polish, restores lustrous shine and deep reflection, then adds a layer of durable protection against the elements. Use V4 on single stage and clear coat finishes to remove scratches and restore deep lustrous shine. Chemical Guys V4 is formulated for fast work time on any dual-action or rotary polishing machine. V4 is water-based, body shop safe, and OEM approved to deliver fast results. For a fast one-step swirl remover that gives durable protection, use Chemical Guys V4 All In One Polish.

Chemical Guys V4 All In One Polish is an all-in-one scratch and swirl remover that delivers a mirror shine with durable protection in one step. The advanced polish is formulated using diminishing abrasive technology. The innovative abrasives cut fast to quickly remove swirls, scratches, and oxidation, then finish like a fine polish to create a wet mirror finish on all painted surfaces. The innovative swirl remover restores a lustrous scratch-free finish without filling in or covering up swirls or defects. V4 adds synthetic sealant technology to seal and protect the polished surface from environmental contamination, UV sunlight, birds, insects, and water spots. V4 delivers a perfect finish is less time while being equally effective on single stage and clear coat paints. The ultra-refined swirl remover is engineered to achieve the finest level of optical clarity by removing scratches, swirls, imperfections, and 2500 grit sanding marks. Use V4 All In One Polish for a mirror finish and durable protection in just one pass

Easy-To-Use Formula

The revolutionary V4 All In One Polish can be used on dual-action and rotary polishers for excellent cutting and polishing capabilities. V4 works on all painted surfaces effectively with your pad of choice. V4 works without oils, silicone, or fillers that merely mask and cover scratches and defects. The results you see are truly the results you get. V4 maximizes efficiency by optimizing work time to deliver perfect results. V4 is VOC compliant and body-shop safe for any paint shop environment. The incredible V4 All In One Polish does it all. Remove swirls, scratches, and oxidation, then add durable protection and shine in just one pass.

Polish And Correct Paint In Less Time

Not every car requires a 3-step polishing job. Cars with heavy swirls, scratches, and oxidation may require heavy compounding to remove deep defects and damage, then finer grades of polish to remove compounding marks and finish with a perfect mirror reflection. For cars with light to moderate swirl marks, scratches, and defects, Chemical Guys V4 All In One Polish is the perfect one-step polish that compounds and finishes in one step. Full polishing detail jobs can take countless hours. With V4, an entire car can be polished in a few hours in just one pass. Use Chemical Guys V4 All In One Polish for fast and effective removal of defects and scratches with durable protection in one easy step.

Polishing: The Art Of Detailing

Auto detailing is mostly a maintenance activity. All the proper wash methods, tools, chemicals, sealants, and waxes are used to reduce the chances of scratching paint, maintain the integrity and appearance of the automobile and hide minor scratches, swirls, and imperfections. The only part of detailing that will actually repair paint, remove scratches, and fix problems is machine polishing. Polishing removes the top layers of "dead" paint to level the surface and reveal a lustrous, deep reflection. Picking the right combination of machine, pad, and chemical is crucial to getting the best results. Chemical Guys V4 All In One Polish is the perfect one-step polish that produces exceptional results and saves time.

Other Sizes Available

V4 All In One Polish + Shine + Sealant is available in [4 ounce](#) and [16 ounce](#) sizes.

How To Use:

Hand Application:

- Work on cool surface.
- Shake Well.
- Always work 2' x 2' section at a time.
- Using a polishing pad, work the V4 All-In-One Polish into the paintwork to remove swirls, scratches, and oxidation.
- Remove excess residue using a premium microfiber towel to achieve a brilliant shine.
- Follow by applying a coat of your favorite Chemical Guys wax or sealant.

DA Application:

- Apply 4-5 drops to desired pad.
- Prime pad with Chemical Guys Pad Conditioner.
- Spread on speed setting 1.
- Set DA machine to speed setting 5-6.
- Always work 2' x 2' section at a time.
- Using moderate pressure, work area in 2-3 passes until polish becomes clear.
- Follow with light pressure to finish.
- Remove residue with a clean microfiber towel.
- For even more durable and long term protection, follow by applying a coat of your favorite Chemical Guys wax or sealant.

Rotary Application:

- Apply 4-5 drops to desired pad. Prime pad with Chemical Guys Pad Conditioner.
- Set machine 1000-1500 RPMs to spread product.
- Always work 2' x 2' section at a time.
- Using just the weight of the machine (no pressure) work area in 3-4 passes until polish becomes clear.
- For final pass adjust speed setting to between 1200-1800 RPMs.
- Work until optical clarity has been achieved.
- Remove residue with a clean microfiber towel.
- For even more durable and long term protection, follow by applying a coat of your favorite Chemical Guys wax or sealant.
