

About Natural Shine Dressing

Chemical Guys Natural Shine is the perfect way to protect and restore your rubber, vinyl, and plastic trim. The unique formula nourishes and restores the surface for a classic shine. Natural Shine quickly and easily creates a dry-to-the-touch shine to tires, dashboards, trim, and door panels. Natural Shine is designed with UV protection that bonds to the surface to resist fading and cracking. Our exclusive formula protects your plastic, rubber, and vinyl surfaces from the elements. The unique synthetic polymer coating nourishes and revitalizes while protecting the surface to restore the original shine. Our Natural Shine formula works great on exterior and interior surface for a classic shine on any trim surface. Natural Shine is designed to restore the original shine to your trim while using coating technology to repel dirt, dust, and debris for a dry-to-the touch feel.

Perfect For Plastic, Rubber, And Vinyl

Natural Shine restores the classic appearance to your plastic, rubber, and vinyl surfaces. Our unique crème creates a natural appearance on tires, dashboards, and trim pieces. Simply apply Chemical Guys Natural Shine using a premium applicator pad to restore the original shine to your trim. Natural Shine is formulated using synthetic polymer coating technology that bonds to the surface to create a durable layer of protection. UV protection prevents cracking and fading to ensure your vehicle's trim stays looking great. Easily apply Natural Shine to your tires for a dry-to-the-touch shine that lasts. Chemical Guys developed Natural Shine to repel dirt, dust, and moisture for improved longevity. Natural Shine will preserve and protect the original appearance of your plastic, rubber and vinyl trim.

Dry-To-The-Touch Feel

Chemical Guys makes protecting and maintaining your plastic, rubber, and vinyl trim easy with the Natural Shine. The advanced synthetic polymer coating ensures your trim is protected against cracking, fading, discoloration, and staining that can occur with age. Chemical Guys developed Natural Shine to give your vehicle's trim a classic shine that is dry-to-the-touch. The easy-to-use formula nourishes the trim on any car, truck, motorcycle, RV, and even boats for a classic shine that also provides protection against the elements.

Natural Shine Technology

Chemical Guys innovative coating technology allows Natural Shine to bond to the surface for improved longevity and durability. We designed Natural Shine to work great on both interior and exterior surfaces for maximum versatility. Simply apply a coat of Natural Shine to the surface using a premium applicator pad to provide maximum protection from the elements. Natural Shine works great on tires, door panels, dashboards, plastic trim and bumpers to restore the original shine to your vehicle. Natural shine is engineered to repel dirt and moisture to ensure your trim stays protected against the elements. The unique emulsion formula is designed to work on a multitude of surfaces. Chemical Guys Natural Shine will take your plastic, rubber, and vinyl trim to the next level of perfection.
