New ones from Continental: Motorcycle Tires 2017

- Anything that fits the road: Sport Touring, Cruising, City
- Four new tires with innovative Continental technology
- Even more grip, durability and stability

Hanover/Korbach, 26th October. Continental whets the appetite for more in 2017 by releasing four new motorcycle tires. The dynamic quartet assists you whether you are touring a big adventure, cruising on country roads or riding a classical street-going machine.

Sport touring enthusiasts can look forward to the new ContiRoadAttack 3, a further evolution of the legendary ContiRoadAttack 2 EVO that made some subtly planned progress. This allround tire in the sport touring segment is predestined for what Continental quality stands for:

TractionSkin ensures an extremely safe and short run-in time, thanks to a new mold coating technology which eliminates the need for tire-release agents. MultiGrip equips the tire with longer durability and optimized grip in extreme lean angles. ZeroDegree ensures reliable stability at high speed and only a low kickback thanks to a 0° steel-belt construction.

A superior wet grip is reached, thanks to RainGrip technology. A newly developed technology called EasyHandling bestows the tire with linear handling even if gyroscopic forces are nominal, e.g. when turning or riding sharp corners. Furthermore, the tire's accuracy has increased by a clear margin.

Fans of big fat rubber who passionately ride their touring or cruising bikes will be astonished as well. ContiTour and ContiLegend are tires that are perfectly tailored to your cruiser, chopper or custom bike.

ContiTour demonstrates what an efficient drainage profile should look like. The pattern design is an all new design. A center tread band on the rear tire without grooves increases mileage and offers directional stability under adverse conditions. A special compound guarantees longer durability while maintaining exceptional handling.

ContiLegend and its vintage whitewall design seem to be from a different era. Despite Continental's MileagePlus technology, a multi grooved pattern design for optimal drainage and consistent performance during tire lifetime, this new rubber roller already looks legendary.

Last but not least, the first choice for lightweight and classic motorcycles is the ContiCity. This newly developed Allround / City tire offers outstanding grip on the

ContiCity

Newly developed Allround / City tire.

- › Outstanding grip on the road due to an unique, triangular pattern profile.
- › Enhanced riding performance and durability.
- › Traditional tire that offers cutting edge performance and durability for light-weight and classic motorcycles.

ContiCity

ContiRoad *ATTACK 3*

The Allround tire with the highest standards in the sport touring segment.

- › Performance oriented pattern design for better drainage in wet conditions.
- › More improved wet grip due to an optimized compound.
- › The EasyHandling technology bestows the tire with linear handling even if stabilizing gyroscopic forces are nominal (e.g. when turning). Simultaneously, accuracy and groundingfeeling are improved at benchmark level - applies to all riding situations in this segment.
- › Comfortable and easy for all demands, whether on long rides or winding roads.
- › Balanced characteristics from the first to the last mile.
- › MultiGrip makes it possible to use a homogenous grip grading with a single compound thanks to temperature controlled curing of the tire during the production process.
