

## **Installation Instructions**

### **CE-602-08**

The CE-602-08 regulator is designed for use on 2008 and later Dyna models.

### **Remove Old Regulator**

- 1) Remove the two- $\frac{1}{4}$  20 cap head screws that hold the regulator on.
- 3) Lift the regulator out and tilt it forward to access the wire connections.
- 3) Remove the locking clips and disconnect the stator and battery plugs.

### **Install New Regulator**

- 1) Remove the retaining clips from the stator and battery connectors on the new regulator. Save them for reassembly.
- 2) Connect the stator and battery plugs.
- 3) Install one plug-retaining clip on each plug.
- 4) Bolt the regulator in place using the stock cap head screws.
- 6) Start the motor and check battery voltage. Battery voltage should run 14.4 to 14.6 volts.

**Have A Good Ride!!**
