Picture 7

4. Your shield is properly installed as shown in picture 7.

Daytona HELMETS

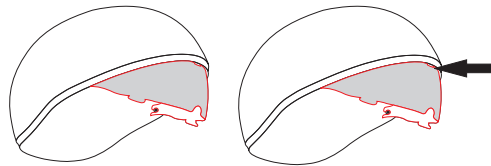

"Leading The Way In Quality Headgear"

DEAR CUSTOMER,

YOUR DAYTONA SKULL CAP WITH INNER SHIELD IS EQUIPPED WITH AN INTERNAL SHIELD. THIS IS MEANT FOR SUN GLARE PROTECTION ONLY. IT HAS AN ANTI-SCRATCH COATING FOR DURABILITY BUT DOES NOT PROVIDE UV PROTECTION. YOU SHOULD NOT RELY ON THIS INTERNAL SHIELD FOR UV OR WIND PROTECTION. THOUGH IT WILL BLOCK MOST WIND, EYE PROTECTION IS STILL RECOMMENDED.

THANK YOU,
DAYTONA HELMETS

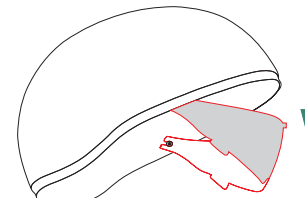

REMOVAL OF SHIELD

Picture 1

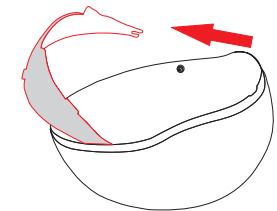

Picture 2

1. Pull down the shield in the open position as shown in picture 1.
2. Push the shield inside from the outside as shown in picture 2 & pull it further down as shown in picture 3.

Picture 3

3. The shield will come out of the shell shown in picture 3.
4. Rotate the shell as shown in picture 4.

Picture 4

5. Pull the shield out from the shell (Both Sides) as shown in picture 4.
