

Instructions

1. Identify lightly soiled area of vehicle. This may include dust, bird droppings, or finger prints.
2. Mist the area with Matte Final Finish.
3. Wipe gently with a microfiber cloth in long horizontal strokes to remove the product.
4. Continue around the vehicle until all problems have been addressed.

Additional Tips

Matte Final Finish is not a replacement for Matte Paint Cleanser and will not remove embedded debris, staining, or etching.

Matte Final Finish works best when applied to recently soiled areas, so make sure to always have a bottle on hand.

Before applying, test a small amount in an inconspicuous place to check compatibility with surface.
