

WHAT THIS TYRE GIVES YOU.

DUNLOP TYRE TECHNOLOGIES

We were the first to apply race tyre performance standards to street tyres. With engineers and designers across Europe, Japan and North America.

JOINTLESS BELT (JLB) CONSTRUCTION

All our radial street tyres are designed using a combination of Computer Aided Design (CAD) technology and Finite Element Analysis (FEA) as well as JointLess Belt (JLB) construction (either front or rear). JLB construction eliminates the belt overlaps resulting in smoother handling and a more stable contact patch with the road.
