

## FEATURES

- > 5-8% power range
- > Fully adjustable
- > Increases power and drivability
- > For carbureted vehicles only

## TESTED TO PERFECTION

Dynojet's jet kits are designed to upgrade every part of your carburetors air/fuel ratio with included step-by-step instructions for whatever you need upgraded. From your fuel needle to the main air jet, Dynojet has extensively tested every component, which means that you'll see results as soon as you rev the engine.

## SMOOTHER POWER

These jet kits give some extreme upgrades in a small package. They increase power and smoothness throughout the entire rev range while maintaining fuel economy. There are multiple kit options from stock commuter motorcycles to race-ready bikes and everything in between.
