

Instructions – PMB-01-2005

Thank you for your purchase! We are confident that you will be pleased with the quality of our product.

Parts List:

1-Kickstand

1-KLX Footpeg Bracket

1-12x1.25x30 Hex Bolt

NOTE: We recommend using a thread-locking agent on all bolt threads.

To install your new kickstand:

1. Remove the stock kickstand.
2. Remove the left footpeg and footpeg bracket.
3. Locate the new left footpeg bracket that comes with your new kickstand.
4. Install the kickstand under the new left footpeg bracket using the stock bolt on the bottom and the new supplied M12x30 hex head bolt on the top.
5. Make sure that you tighten the footpeg bracket bolts to the correct torque as specified in your owner's manual.
6. Re-install the footpeg.
7. Periodically check the footpeg mounting bolts, and kickstand pivot bolt for tightness.

To prevent damage:

- Clean and lubricate the kickstand pivot area after each ride! We recommend using a penetrating lube, such as WD-40. If necessary, you can remove the back cover plate for additional cleaning.
- Carefully position kickstand up and down.
- Do not start/sit on bike with the kickstand down.
