

Instructions – PMB-01-4008

Thank you for your purchase! We are confident that you will be pleased with the quality of our product.

Parts List:

1-Kickstand

NOTE: We recommend using a thread-locking agent on all bolt threads.

To install your new kickstand:

1. Remove the left footpeg and bracket.
2. Install the kickstand under the left footpeg bracket using the stock bolts. We recommend using a removable thread-locking agent on the bolts. Make sure you tighten the footpeg bracket bolts to the correct torque per your owner's manual.
3. Re-install the footpeg.
4. Periodically check the footpeg mounting bolts, and kickstand pivot bolt for tightness.

To prevent damage:

- Clean and lubricate the kickstand pivot area after each ride! We recommend using a penetrating lube, such as WD-40. If necessary, you can remove the back cover plate for additional cleaning.
- Carefully position kickstand up and down.
- Do not start/sit on bike with the kickstand down.
