

OFF ROAD

CDI 2-STROKE

CDI UNITS 2-STROKE ENGINES

INCLUDED IN THE KIT

MAP SWITCH

GET is back in the 2-stroke world by introducing a brand new range of CDIs for the optimum management of the ignition curve and the maximization of power on carburettor bikes. GET CDIs are plug&play on standard engines and have 2 maps, Map 1: Racing and Map 2: Wet.

Via our MAYA software, separately available, it will be possible to customize even further the ignition curve and adapt it to every need.

Feel the difference with GET. Discover other motorcycle performance chips and programmers on our website.
