TO ENSURE A GOOD, WATER-TIGHT ROLL ON BAG ENDS:

STEP ONE: Leave ample room to allow for at least three rolls to seal. Open air purge valve, squeeze out excess air and fold the seam over on itself and roll another two times for a total of three rolls.

STEP TWO: Holding the rolls in place, connect the compression straps on both sides. Pull tight.

STEP THREE: Connect the top compression strap over the top of the folds. Pull tight. Close air purge valve.

PACKING TIPS

- Thread Coyote/Great Basin Saddlebag beavertail compression straps through daisy chain and tighten.
- Fill bag, positioning items you want to keep handy near the ends.
- Roll ends at least three times, keeping rolled bag flat and wrinkle free.
- Fasten side release buckles and cinch down closure straps to maintain waterproof seal.
- Roll and close one end, fill bag with lightweight bulky items, positioning gear you want to keep handy near the ends. Squeeze excess air from duffel, then roll at least twice more and secure with closure straps.
- Check and re-tighten all straps at stops, as gear can shift and compress.
- For additional off-road stability, use Giant Loop's Pronghorn Straps™.
- Do not overstuff or over pack. Leave ample room to roll top at least three times to make a waterproof seal.
- Pack hard, sharp or metallic gear in protective wrappers and/or sleeves.
 Also protect from contact with other solid objects that may abrade fabric such as hard metal rack surfaces.
- Avoid exposure to chemicals that may degrade fabric, such as insect repellents containing DEET.
- Hand wash with mild soap and warm water. Hang to air dry. DO NOT MACHINE WASH.
- To avoid stench, mold and mildew, do not leave wet gear in sealed bags for extended periods, and thoroughly air dry bags before storing them.

Perfect fit on most hard luggage.

RECOMMENDED OPTIONAL ACCESSORIES

Pronghorn Straps Heavy-duty tension straps solve a million problems.

Possibles Pouch Adds 3.5 liters of waterproof storage.
