Installation Instructions

1. Remove the 2 grab rail bolts from the RH side of the fender. We recommend removing one bolt at a time to avoid movement of the grab rail. **Note: Only the bolts are to be removed and replaced.**
2. Using the 8mm polished SS socket head bolts and docking post replace the existing grab rail bolt, leaving all other OEM parts in place. Torque to 12 ft. lbs.
3. Repeat steps 1 and 2 on the LH side of the fender.
4. Install the EASY BRACKETS on the docking posts. **Note:** Use the key provided to open the cam lock prior to installation on the docking posts. The key can not be removed until the cam lock is fully engaged under the docking post.
5. Hold the RH saddlebag against the EASY BRACKET. Position the saddlebag as desired noting the clearances from the seat, turn signals and any lower obstructions such as chain guards, axle nuts, etc. Mark the outer edge of the bracket on the saddlebag. Remove the EASY BRACKET from the motorcycle.
6. Place the bracket on the saddlebag within the outline and drill the 4 holes for mounting. Attach the bracket to the saddlebag using the (4) 3/8 x 1 black button head bolts, (4) 3/8 fender washers and (4) 3/8 Nylon locking nuts (**All 4 mounting points MUST be utilized**). Install the completed RH saddlebag with EASY BRACKETS on the motorcycle. **Note: The cam lock must be fully engaged and the key removed to ensure the EASY BRACKETS are properly installed and ready for use.**
7. Repeat steps 4, 5, and 6 on the LH side of the fender.
