

FEATURES

CUSTOM	Details
Airbag	Our airbag offers full protection for back, spine, neck, chest, ribs, pelvis, abdomen, etc. With an inflation time of under 80ms the Custom has your back. Stretch panels positioned on top of the back section optimizes protection of the neck (neatly hidden by velcro until deployment).
Excellent protection w/ TURTLE technology	This leather vest integrates Helite's patented TURTLE technology with the airbag located under a SAS-TEC level 2 back protector - a major innovation and improvement for protection of the back and spine resulting in improved absorption and distribution of harsh impacts as well as providing protection from intruding objects.
High quality leather	Our Custom vest is constructed with high quality black leather (cow hide 1,2 mm).
Customization	Zipper access at the back and left side making it a cinch to stitch on patches and emblems.
Pockets	3 outside pockets, 2 inside pockets (classic + smartphone).
Comfortable cut	Stretchy leather side panels ensures a fitted cut and high comfort. Low cut at the underarms for freedom of movement which also makes it easy to wear over other motorcycle equipment.
Reconditioning	No need for repacking in the event of a deployment. 100% self-serviceable.
Mechanical trigger system	Helite airbags are mechanically triggered to avoid unexpected airbag activation. No special tools or technical knowledge required to install the lanyard on your motorcycle.
Certification 	CE certification - Custom is certified by the external laboratory CRITT Sport, the French specialist for objectively testing Personal Protective Equipment (PPE).

Looking for dependable motorcycle riding gear? Rely on Helite for quality and long-lasting products.
