

Elements	Details
Airbag	The shape of our Helite airbag offers a full protection, absorbs impacts and stabilizes the whole upper body from head to tailbone. The gas volume of 18 liters provides optimal pressure in the event of a fall. Very fast inflation time for efficient protection -> 75 ms.
Excellent protection with TURTLE technology	Front and back body armor for double the TURTLE effect! The Turtle Technology principle is similar to a helmet: soft on the inside, hard on the outside. A huge improvement for rider protection. The result? Absorption/distribution of shocks that are considerably higher as well as protecting riders from protruding objects.
Aerodynamics	The cut of the GP AIR has been specially developed for racers on the track. In order to be able to wear the GP AIR over the suit, space has been left for the hump. Thanks to accordion leather side panels and velcro fastenings on the front, the GP AIR fits all body types.
Abrasion resistant materials	Very strong abrasion resistance leather (cow hide 1,2 mm) + foam to protect the airbag chamber. Leather sliders have been added in the back for even more protection.
Reconditioning	Quick and easy replacement of the CO2 cartridge directly by the rider. The size of the cartridge is proportional to the size of the airbag. One cartridge is included with the GP AIR. We recommend to have an additional cartridge in case of a fall.
Mechanical trigger system	Helite airbags are 100% mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge are required to install the lanyard on the motorcycle.
Customization	You can customize your GP AIR with quick access to the front and back. There are many possibilities to make your airbag vest unique. Find all the information in the section "How to customize your GP AIR?"
Certification 	CE certification - GP AIR is certified by the external laboratory CRITT Sport, the French specialist for objectively testing Personal Protective Equipment (PPE).

Black leather sliders

For replacing the sliders of your GP AIR.

Motorcycle lanyard

If you use several motorcycles, you can buy the motorcycle lanyards separately.

Clip hanger

The clip hanger allows you to attach your lanyard when you are not using your motorcycle.

Cartridge 60CC

In the event of a fall, replace the empty cartridge with a new one of the same capacity of the Helite brand.

* RRP with VAT

How to customize your GP Air?

The success of our GP AIR has given ideas to make the pilots create their unique GP AIR. You have several options to customize your airbag vest.

The German store Rabatz Racing offers the production of customized leather patches.

Our ambassador, the racer Xavier Navand, had his GP AIR customized by a french painter.

The airbag racing jacket has been specially developed for the race track. Attention has been focused on aerodynamics with a perfect fit and a space for the suit's hump. For more security, the jacket is made with abrasion resistant materials and with an excellent protection at the front/back for a double TURTLE effect! An airbag vest designed and tested by pilots for pilots!
