XENA

FEATURES

XENA	Details
Airbag	The shape of our airbag offers full protection: back, neck, spine, chest, ribs, pelvis, abdomen, etc. Optimal protection is attained with 18 L of gas displacement. Fast inflation time under 100 ms. In order to optimize protection for the neck, stretchy fabric is positioned on top of the back.
Excellent protection with TURTLE technology	This leather jacket integrates Helite's patented TURTLE technology: the airbag is located under the back pro-tector (SAS-TEC level 2) - an incredible innovation meant to improve protection for the back which results in the absorption and distribution of impacts considerably higher than ever before. All this while protecting riders from intruding objects as well.
Leather of high quality	Our Xena lady's jacket is constructed with high quality black leather (cow hide 1,2 mm).
Protectors	Elbow and shoulder protectors are integrated in our leather jacket as well as SAS-TEC back pro-tector Level 2 for the " TURTLE effect".
Insulation Liner	Removable thermal lining, 100% Polyester (color: bordeaux) to drive all year.
Adjusted and comfortable cut	Leather stretch panels on the sides and bottom of the back which ensure a comfortable fitted look. Stretchy, breathable fabric under arms for great mobility. Hip size adjustable with velcro.
Pockets	2 outside pockets, 2 inside pockets (classic + smartphone).
Reconditioning	Quick and easy replacement of the CO_2 Cartridge. It is nicely hidden in a pocket for more aesthetic.
Mechanical trigger system	Helite airbags are mechanical to avoid unexpected airbag activation and changing batteries. No special tools or technical knowledge required to install a Helite system on your motorcycle.
Certification CE	CE certification - Xena is certified by the external laboratory CRITT Sport, the French specialist for objectively testing Personal Protective Equipment (PPE).

Looking for dependable motorcycle riding gear? Rely on Helite for quality and long-lasting products.
