

HJ-20ST SHIELD REMOVAL AND INSTALLATION

Helmet Model: RPHA ST

Removal

1. Lift up the handle-locker.

2. Open shield to its maximum open position.

3. Push the handle-locker to the open position. The shield will be automatically released out of base ratchet mechanism.

Installation

1. Ensure that the handle-locker is in the open position.

2. Align and insert the top of the shield guide into the plate-gear guide.

3. With the guides properly aligned, press the lower section of the shield into the plate-gear mechanism. The locking tab should pop into position, locking the shield into place.
