### TANK REMOVAL

Drain all fuel from OEM fuel tank into a government approved fuel container with a greater capacity than fuel tank on vehicle.

Remove the seat, fuel line, radiator shrouds & tank. Remove the petcock from the OEM tank.

### TANK INSTALLATION

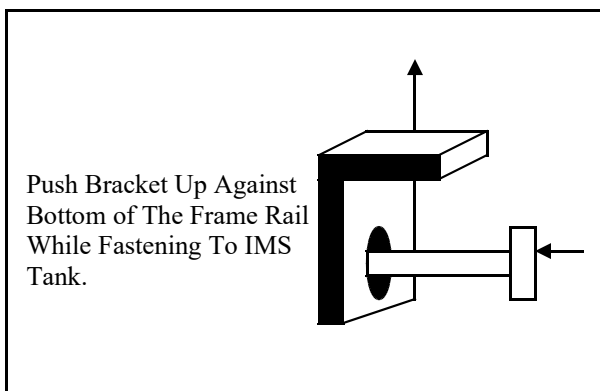

Install the stock petcock into the IMS tank using the OEM petcock gasket & the bolts. Tighten snugly, but DO NOT over tighten.

Place the IMS tank onto the motorcycle, making sure that it doesn't bind & rests on the frame rails.

Insert the supplied bolts through the IMS L-brackets & thread them loosely into the stock mounts on the frame.

While pushing the brackets firmly up against the frame rails, tighten them firmly (see illustration below).

Attach the OEM fuel line, radiator shrouds & seat. Fill tank with fuel. Make sure there isn't any leaks & enjoy your longer ride!
