MOTOCROSS BRAKING DISCS

JT Braking is a premium quality brand of expertly designed brake discs which offer outstanding performance for all modern off-road models, with perfect braking control in even the most difficult and unexpected of conditions

PATENTED SELF-CLEANING HOLES

Unique conical holes help keep the pad and disc clean from debris, as well as providing weight reduction and heat dissipation (Patent Number GB2476859)

HIGHEST QUALITY MATERIALS

High quality stainless steel, fully heat-treated and machined to the closest of tolerances

STEPPED OUTER PROFILE

Specially machined design enhances heat dissipation and helps resist warping at high temperatures

COATED SURFACES

Electrostatically enamel paint coated non-braking surfaces

FULL PAD COMPATIBILITY

Engineered and race tested to work perfectly with all types of brake pads - metal sintered, semi-sintered, and organic - for a controlled, consistent braking performance in all wet, muddy, and dry conditions
