

INSTALLATION INSTRUCTIONS

PART NUMBER: BM-6012

Congratulations, you have purchased the finest [air filter](#) that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

1. Using supplied grease; apply 2 separate beads of grease in the area shown.

2. Insert filter into frame. Note the features on one side of the filter. These must go into the air box first during installation.

3. With filter inserted into frame, insert assembly into air box.
