

INSTALLATION INSTRUCTIONS

Part Number HA-1009

Congratulations, you have just bought the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N air filter seals properly.

INSTALLATION:

1. Remove the stock [air filter](#).
2. Install the K&N air filter. The round filter opening will be facing down into the air box and will fit around the flange. (fig. 1)
3. Completely seat the K&N air filter. The filter will sit flush in the air box. (fig. 2)
4. Reinstall the air box lid.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
