

INSTALLATION INSTRUCTIONS

PART NUMBER: TB-9095

Congratulations, you have purchased the finest [air filter](#) that money can buy. With proper care, this filter can last one million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the K&N Air Filter.

INSTALLATION:

1. Remove the stock air filter.
2. Install the K&N Air Filter with the “ENGINE SIDE” marking facing towards the engine.
NOTE: The air filter must be installed in this direction otherwise the filter may not seal and damage to the engine can occur.
3. Reinstall the air box lid.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
