

INSTALLATION INSTRUCTIONS

Part Number YA-5008

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures **MUST** be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Remove the four screws on the air box lid. (fig. 1)
2. Remove the stock air filter. (fig. 2)
3. The K&N [Air Filter](#) has two arrows embossed on the backside of the filter. Install the K&N Air Filter in the stock air box with the arrows pointing DOWN. (fig. 3 and 4)
4. Re-install the air box lid. The tapered posts on the backside of the lid will put pressure on the K&N Air Filter, keeping it in place. (fig. 5)
5. Re-install the four screws into the air box and tighten.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
