

# INSTALLATION INSTRUCTIONS

Part Number YA-8083

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Air Filter seals properly.

**CAUTION!!** This filter does not come pre-oiled. It must be oiled prior to installation.

## OILING INSTRUCTIONS

1. Cut the tip off the provided oil pillow pack.
2. Run the tip of the oil pillow pack along the edge of each pleat.  
**Note:** Use only 1/4 of the oil pillow pack. If the entire oil pillow pack is used the filter will be over oiled.
3. The K&N [Air Filter](#) is now ready to be installed.

## INSTALLATION

1. Remove the stock air filter and the air filter frame.  
**Note:** The stock air filter frame will not be used with the K&N Air Filter.
2. Apply a thin layer of the supplied K&N Sealing Grease to the sealing side of the air filter.  
**Note:** The sealing side does not have the K&N logo and part number engraved in it.
3. Install the K&N Air Filter into the air box.  
**Note:** The K&N logo and part number will be facing out.
4. Reinstall the air box lid and tighten the screws.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
