USING THE TECH-CONNECT HOLDER

STEP 1 Open the Tech-Connect Holder so the sides are separated from the center section. Peel the narrow pieces of foam off the backing paper, center them in the inset portion of the sides and apply them to the sides of the holder. Peel the wide piece of foam from the backing paper, center it in the inset portion in the center and apply it to the center of the holder. PIC 5 and PIC 6

STEP 2 To adjust the opening in the Tech-Connect larger, turn the knobs on the outside of the Tech-Connect (PIC 5) counter clockwise until your device will fit in between the arms. Turn the knobs clockwise to close the arms around the device. There is a locking detent under the knobs to hold them in place once they come in contact with the device. DO NOT over tighten the knobs. Tightening them too tight will not allow you to loosen them with your fingers. Periodically check the tightness of the mobile device in the Tech-Connect.

NOTE: For best results keep "L" shaped foot portion of the Tech-Connect Holder on the bottom of the device. Keep the device holding support arms centered on the mounting plate.
