NOTICE THESE INSTALLATION INSTRUCTIONS CONTAIN IMPORTANT INFORMATION. ENSURE THE END USER RECEIVES THIS COPY AND IS AWARE OF ITS IMPORTANCE FOR FUTURE USE.

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let motorcycle cool.

WARNING A FACTORY SERVICE MANUAL WILL BE HELPFUL IN PERFORMING THIS INSTALLATION. DO NOT ATTEMPT TO PERFORM THIS INSTALLATION IF YOU ARE NOT CONFIDENT IN YOUR ABILITY TO COMPLETE ALL OF THE STEPS IN THE PROCEDURE; CONSULT A TRAINED TECHNICIAN. IMPROPER INSTALLATION COULD RESULT IN SERIOUS INJURY OR DEATH.

STEP 2 Refer to PIC 2. Unfasten, disconnect, and remove existing Headlight from motorcycle. Set mounting hardware and parts aside, they will be reused.

Note: Take note of the order of how the parts were removed. Installation of the new lights will be in the reverse order of how the existing lights were installed.

STEP 3 Locate provided Headlight. Locate OEM mounting parts (brackets, trim rings, etc) that were removed in Step 2. Attach OEM mounting parts to headlight, if applicable.

Note: Refer to PIC 3. The red/white wire, on the back of the Headlight, is the power source wire for the halo ring part of the light. If you want the halo ring to work as a separate function, vs. constantly running with the headlight, the red/white wire can be cut and spliced to a different power source. Doing this will require additional tools and supplies, as well as potential modifications made to the light housing case and other areas of your bike.
