- STEP 4** Locate the mounting hardware and brackets that were removed in Step 2. Align and place OEM brackets on the backside of the light, if applicable.

*Note: Refer to PIC 5. The red/white wire, on the back of the Passing Lights, is the power source wire for the halo ring part of the light. If you want the halo ring to work as a separate function, vs. constantly running with the passing lamps, the red/white wire can be cut and spliced to a different power source. Doing this will require additional tools and supplies, as well as potential modifications made to the light housing case and other areas of your bike.*

- STEP 5** **FOR H-D MOTORCYCLE:**  
Refer to PIC 6. Connect the 2-blade plugs of the passing lamp passing lamp housing connector. Be sure wires correspond with the housing connectors (red to positive, black to ground).

**FOR NON-H-D MOTORCYCLES:**  
Splice the red (positive) and black (ground) wires of the connector plug, with positive and ground wires of the passing lamp housing wires.

- STEP 6** Refer to PIC 7 through 9. Fasten the passing lamp to the passing lamp housing case in the reverse order that it was removed in Step 2, using the OEM parts and hardware that were removed in Step 2.

- STEP 7** Reinstall main fuse, turn ignition on, and test light. Turn ignition off after testing.

 **WARNING**

VISIBILITY IS A MAJOR CONCERN FOR MOTORCYCLISTS. A LIGHT MALFUNCTION COULD RESULT IN DEATH OR SERIOUS INJURY. ENSURE PROPER LIGHT OPERATION BEFORE RIDING THE MOTORCYCLE.

**NOTICE**

IT IS THE INSTALLER'S RESPONSIBILITY TO ENSURE THAT ALL OF THE FASTENERS (INCLUDING PRE-ASSEMBLED) ARE TIGHTENED BEFORE OPERATION OF THE MOTORCYCLE. KURYAKYN WILL NOT PROVIDE WARRANTY COVERAGE ON PRODUCTS OR COMPONENTS LOST DUE TO IMPROPER INSTALLATION OR LACK OF MAINTENANCE. PERIODIC INSPECTION AND MAINTENANCE ARE REQUIRED ON ALL FASTENERS.
