- 1 Installation Instructions

*Please read and understand entire instructions before starting installation.*

**THANK YOU FOR CHOOSING KÜRYAKYN!**

**CAUTION!** Ensure that the installation of this product does not interfere with the proper operation of the motorcycle before riding.

**ATTENTION!** It is the installer's responsibility to ensure all fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.

**ATTENTION!** Ensure that the supplied anti-seize is applied to all threaded fasteners before installation; this will make future removal of the fasteners easier.

**ATTENTION!** Use the supplied anti-seize for any chrome-to-chrome fasteners; this will prevent galling and make future removal of fasteners easier.

**TOOLS SUGGESTED**

Set of hex wrenches

**PROCEDURE**

**STEP 1** Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

**STEP 2** Remove your footrest; save the hardware, it will be reused.

**STEP 3** Remove old clevis; it will not be reused.

**STEP 4** Install the new clevis; leave the fasteners loose until you have installed your footrest and adjusted the clevis.

**STEP 5** Install your footrest.

**-cont.-**

**STEP 6** Adjust for comfort and clearance then tighten the fastener shown in [PIC.1](#)

**NOTE** Tightening the fastener shown in [PIC.1](#) will positively engage the splines (shown in red).

**STEP 7** Tighten all of the fasteners and ensure proper clearance and operation before riding the motorcycle.

*Ride On!*
