STEP 2 Determine the left from the right (sitting on bike) Floorboard insert. PIC 1

-cont.-

STEP 3 Starting with the right side, remove the floorboard pad by gently pulling up on the rubber pad while simultaneously pushing on the rubber darts protruding from the bottom of the footboard assembly as shown in PIC 2.

NOTE: Some floorboards may not have tapered holes for the rubber darts as shown in PIC 3 and PIC 4. On these floorboards drill the holes out with a 9/32" drill bit; then use the round file and/or the emery cloth to round the edges of the holes.

STEP 4 Make sure the pivot pins are in place PIC 5; starting on that side of the floorboard, install the new insert and then press the darts through the holes.

NOTE: It may be helpful to apply a small amount of dish soap on the darts to ease the installation.

STEP 5 Repeat STEP 3 and STEP 4 for the left side.

STEP 6 You may choose to cut off the excess rubber below the head of the darts as shown in PIC. 6; however, this may make reinstalling the insert more difficult in the future.
