TO ALL INSTRUCTIONS, WARNINGS, CAUTIONS AND ATTENTION NOTES
REGARDING THE USE AND CARE OF THIS PRODUCT.**

ATTENTION! This indication alerts you to the fact that ignoring the contents described herein may negatively affect product performance and functionality.

TOOLS SUGGESTED

Set of Hex Wrenches

**STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE
PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.**

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

STEP 2 Separate the two halves of the brake pedal cover. Make sure the rubbers protrude evenly through the openings in the brake cover top.

STEP 3 Sandwich the stock brake pedal tread between the top and bottom halves. The brake lever must pass through the opening in the bottom half of the cover.

STEP 4 Secure the top to the bottom with the 10-24 socket heads provided.

STEP 5 Any free play in the cover can be removed by tightening the set screws in the back half of the cover. Do not over tighten

-cont.-

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.
