

Our Manufacturing Facility - Wiring Products Proudly Made in the USA!

Let us quote your next wire processing job! At Lectric Limited, our 28,000 sq.ft. production facility, located just outside of Chicago, IL, specializes in various stages of wire harness manufacturing and wire processing:

- Cut Wire
- Strip Wire
- Terminate Wire (we specialize in Packard Electric® terminal crimping)
- Ultrasonic or Clip Splicing
- Dip Soldering
- Assembly (to your specifications)
- Quality Control Electronic Circuit Testing
- *and more.*

Our assembly facility is highly automated and efficient. Our facility has a climate controlled environment for our production staff, which helps insure your products are assembled in ideal conditions. We are committed to building quality products the American way. Your satisfaction is our number one priority and our staff understands that our success is dependent upon your success.

Lectric Limited offers:

- Quality Workmanship
- Prompt Delivery
- Personalized Customer Service
- Cost Competitive Prices

Feel the difference with Lectric Limited.
