YEARS  
OF INNOVATION

## **MPS-8CSRGB** 8" CAN SPEAKERS WITH RGB LIGHTS

### PRODUCT OVERVIEW

Metra PowerSports can speakers are designed for whatever the powersports customer can throw at it. The rugged, UV protected, high temp ABS provides a durable housing by employing a dual wall design. The speakers are polypropylene and the tweeters are PEI (Polyetherimide) so they can handle getting wet and still perform like they were intended, with an IP rating of IPX6. As an added feature the speakers include RGB lighting that can be connected to MPS-RGBC-4 controllers. For versatile mounting options, they come with two mounting clamps with rubber inserts for four different sizes. The speakers can also be rotated and repositioned for optimal sound performance.

- 8" universal can speakers with RGB Lighting
- Housing: Marine grade, UV treated, molded, high temp ABS. Dual wall design for strength and rigidity
- Woofer: 8" polypropylene. Designed for use in wet locations with a 25mm or 35mm voice coil, 11oz or 21 oz magnet with a 3" passive radiator for extended bass response
- Tweeter: 20mm PEI (Polyetherimide) bridge mounted into grille with a rotational mounting base for optimum speaker placement
- 12ft of flexible over-jacketed OFC copper wire with waterproof connector. (Can be extended with SWLED6-250 specialty wire from The Install Bay which must be hard-wired)
- Mating water-resistant connector breaks out to (2) 18 AWG speaker wires and a Micro DIN connector with 22 AWG RGB wire designed to be used with MPS-RGBC-4 controller)
- Water Resistance - IPX6
- Impedance: 4 ohms
- Crossover: 6db passive
- Freq response: 60Hz to 20 KHz, SPL: 90 db
- Power handling: RMS - 80 watts, Peak - 160 watts (8")
- Sold as a pair, warranty: 1 Year
- This product can be used with RGB LED Controller (MPS-RGBC-4) sold separately
- Includes 1.5", 1.75", 1.875" and 2" clamps
