

Benefits

Water Drainage

Mileage

Durability

Grip on wet and all kind of asphalt

Classic tread design combined with modern compound solution that enhance chemical grip and adhesive properties in all different situations.

Our patented mixing process delivers a more homogeneous compound that emphasizes the chemical properties and results more resistant to the wear process. Same compound on front and rear provides a homogeneous contact feeling into lean.

Benefits

Water Drainage

Mileage

Durability

Best performance till the last mile

Best performance till the last mile, adaptability to different conditions and riding, comfort and agility in maneuvers even with worn tyre.

Benefits

Water Drainage

Mileage

Durability

Robustness

Regular wear of the tread design and resistance to abrasion of the compound for an extended durability and performance robustness.
