## **Adventure mileage**

The latest generation of polymers blended in the compound lend a remarkable resistance to abrasion and knob tearing.

KAROO™ 3 has a great effective mileage in this segment and provides the 30% more durability than its predecessor MCE KAROO™ and MCE KAROO™(T).

## Off-road traction and power

The exclusive V-shaped layout of blocks with composite orientation of working edges and the variable spacing between knobs, provides excellent off-road traction in different conditions, especially those found in the long-distance rally raids on sandy, clayey and hard-packed paths.

## High speed stability

The big size of the blocks of the tread pattern and their coupling with a stiff carcass, lends perfect stability at high speeds, even when fully loaded with luggage and passenger, when reaching the next stage of the adventure on paved or hard packed-roads.
